Impact of COVID-19 Pandemic

During 2020, da Vinci procedure volumes and system placements were significantly impacted by the COVID-19 pandemic, as healthcare systems around the world diverted resources to respond to COVID-19. The impact of the COVID-19 pandemic on the Company's business has, and continues to, differ by geography and region. In the U.S., for example, while da Vinci procedures have recovered a significant portion of the pre-COVID-19 levels, the resurgence of COVID-19 in some states has had, and will likely continue to have, an adverse impact on the Company's procedure volumes. Due to the continued uncertainty around the scope and duration of the pandemic globally, we cannot, at this time, reliably estimate the future impact on our operations and financial results.

Commenting on the announcement, Intuitive CEO Gary Guthart said, "Our customers continued to choose our products in the fourth quarter during a difficult healthcare environment. As we enter 2021, we remain focused on supporting our customers and advancing our innovative ecosystem of solutions aimed at improving surgery."
