QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2017

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 000-30713

Intuitive Surgical, Inc.
(Exact name of Registrant as specified in its Charter)

Delaware
(State or Other Jurisdiction of
Incorporation or Organization)

77-0416458
(I.R.S. Employer
Identification No.)

1020 Kifer Road
Sunnyvale, California 94086
(Address of principal executive offices) (Zip Code)

(408) 523-2100
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. YES NO

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). YES NO

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company or an emerging growth company. See definition of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer	<input checked="" type="checkbox"/>	Accelerated filer	<input type="checkbox"/>
Non-accelerated filer	<input type="checkbox"/> (Do not check if a smaller reporting company)	Smaller reporting company	<input type="checkbox"/>
		Emerging growth company	<input type="checkbox"/>

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). YES NO

The Registrant had 112,047,836 shares of Common Stock, \$0.001 par value per share, outstanding as of October 17, 2017.

(1) The Company adopted ASU No. 2016-09, *Improvements to Employee Share-based Payment Accounting*, during the first quarter of 2017. This ASU eliminates the requirement to reclassify cash flows related to excess tax benefits from operating activities to financing activities on the consolidated statements of cash flows. The Company adopted this provision retrospectively by reclassifying \$39.5 million of excess tax benefits from financing activities to operating activities for the nine months ended September 30, 2016.

See accompanying Notes to Condensed Consolidated Financial Statements (Unaudited).

INTUITIVE SURGICAL, INC.
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

In this report, “Intuitive Surgical”, “Intuitive”, and the “Company” refer to Intuitive Surgical, Inc. and its wholly- and majority-owned subsidiaries.

NOTE 1. DESCRIPTION OF THE BUSINESS

Intuitive Surgical, Inc. designs, manufactures, and markets *da Vinci*[®] Surgical Systems and related instruments and accessories, which taken together, are advanced surgical systems that the Company believes enable a new generation of surgery. This advanced generation of surgery, which the Company calls *da Vinci* Surgery, combines the benefits of minimally invasive surgery (“MIS”) for patients with the ease of use, precision, and dexterity of open surgery. A *da Vinci* Surgical System consists of a surgeon’s console, a patient-side cart, and a high performance vision system. The *da Vinci* Surgical System translates a surgeon’s natural hand movements, which are performed on instrument controls at a console, into corresponding micro-movements of instruments positioned inside the patient through small incisions, or ports. The *da Vinci* Surgical System is designed to provide its operating surgeons with intuitive control, range of motion, fine tissue manipulation capability, and Three Dimensional (“3-D”) High-Definition (“HD”) vision while simultaneously allowing surgeons to work through the small ports enabled by MIS procedures.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

In the opinion of management, the accompanying unaudited Condensed Consolidated Financial Statements (“Financial Statements”) of Intuitive Surgical, Inc. and its wholly- and majority-owned subsidiaries have been prepared on a consistent basis with the audited Consolidated Financial Statements for the fiscal year ended December 31, 2016, and include all adjustments, consisting of only normal recurring adjustments, necessary to fairly state the information set forth herein. The Financial Statements have been prepared in accordance with the rules and regulations of the Securities and Exchange Commission (“SEC”) and therefore, omit certain information and footnote disclosure necessary to present the Financial Statements in accordance with accounting principles generally accepted in the United States (“U.S.”) (“U.S. GAAP”). These Financial Statements should be read in conjunction with the audited Consolidated Financial Statements and notes thereto included in the Company’s Annual Report on Form 10-K for the fiscal year ended December 31, 2016, which was filed with the SEC on February 6, 2017. The results of operations for the first nine months of fiscal year 2017 are not necessarily indicative of the results to be expected for the entire fiscal year or any future periods.

The Financial Statements include the results and the balances of the Company's majority owned joint venture with Shanghai Fosun Pharmaceutical (Group) Co., Ltd. The Company holds a controlling financial interest in the joint venture and the noncontrolling interest is reflected as a separate component of consolidated stockholders’ equity. Noncontrolling interest in net income was inconsequential to the consolidated results for all periods presented and, therefore, has not been separately presented in the condensed consolidated statements of comprehensive income.

Common Stock Split

Shares issued pursuant to the three-for-one stock split (the “Stock Split”) of the Company’s issued and outstanding common stock, par value \$0.001 per share, were distributed on October 5, 2017, to stockholders of record as of September 29, 2017. All share and per share information presented in the Financial Statements have been retroactively adjusted to reflect the Stock Split.

Recent Accounting Pronouncements Not Yet Adopted

In May 2014, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) No. 2014-09, *Revenue from Contracts with Customers*. This new standard will replace most of the existing revenue recognition guidance in U.S. GAAP when it becomes effective and permits the use of either the retrospective or cumulative effect transition method. The new standard, as amended, becomes effective for the Company in the first quarter of fiscal year 2018.

The Company currently plans to adopt this accounting standard in the first quarter of fiscal year 2018 using the full retrospective method to restate each prior reporting period presented in its Financial Statements. While the Company is continuing to assess the effect of this new standard, the Company currently believes that contractual future billings related to services included in its multi-year contracts will be considered performance obligations that should be part of the contract consideration allocated to all deliverables. Under the current standard, future service billings are considered to be contingent revenue. Accordingly, the amount of contract consideration allocated to the performance obligations identified in the Company’s system arrangements would be different under the new standard than the amount allocated under the current standard, which will result in an acceleration of revenue recognition. The Company currently expects that under the new standard a greater amount of the contract consideration would be allocated to the product-related performance obligations, which are generally delivered upfront. In addition, the Company

also expects that incremental contract acquisition costs of obtaining revenue generating contracts, such as sales commissions paid in connection with system sales with multi-year service commitments, would be capitalized and amortized over the economic life of the contract. Under the current guidance, the Company expenses such costs when incurred.

The new revenue standard is principle based and interpretation of those principles may vary from company to company based on their unique circumstances. It is possible that interpretation, industry practice, and guidance may evolve as companies and the accounting profession work to implement this new standard. The Company is still in the process of evaluating the effect of the new standard on the Company's historical financial statements and disclosures. While the Company has not completed its evaluation, the Company currently believes that the impact to revenue and expense recognized will not be material to any of the years presented. As the Company completes its evaluation of this new standard, new information may arise that could change the Company's current understanding of the impact to revenue and expense recognized. Additionally, the Company will continue to monitor industry activities and any additional guidance provided by regulators, standards setters, or the accounting profession and adjust the Company's assessment and implementation plans accordingly.

In February 2016, the FASB issued ASU No. 2016-02, *Leases (Topic 842)*, which amends the existing accounting standards for leases. The new standard requires lessees to record a right-of-use asset and a corresponding lease liability on the balance sheet (with the exception of short-term leases). The new standard also requires expanded disclosures regarding leasing arrangements. The new standard becomes effective for the Company in the first quarter of fiscal year 2019 and early adoption is permitted. The new standard is required to be adopted using the modified retrospective approach and requires application of the new standard at the beginning of the earliest comparative period presented. The Company generally does not finance purchases of equipment or other capital, but does lease some of its facilities. The Company's customers finance purchases of *da Vinci* systems and ancillary products, including directly with the Company. It is currently unknown whether the new standard will change customer buying patterns or behaviors. The Company is evaluating the effect that this new standard will have on its Financial Statements and related disclosures.

In October 2016, the FASB issued ASU 2016-16, *Income Taxes (Topic 740): Intra-Entity Transfer of Assets Other than Inventory*, which requires the recognition of the income tax consequences of an intra-entity transfer of an asset, other than inventory, when the transfer occurs. This ASU will be effective for the Company in the first quarter of 2018. This ASU is required to be adopted using the modified retrospective approach, with a cumulative catch-up adjustment to retained earnings in the period of adoption. The Company is currently evaluating the impact of adopting this ASU on its Financial Statements.

In January 2017, the FASB issued ASU 2017-01, *Business Combinations (Topic 805): Clarifying the Definition of a Business*, which clarifies the definition of a business to assist entities with evaluating whether transactions should be accounted for as acquisitions (or disposals) of assets or businesses. The standard will be effective for the Company in the first quarter of 2018. Early adoption is permitted. The Company is currently evaluating the impact of adopting this ASU on its consolidated financial statements.

Adopted Accounting Pronouncement

Beginning fiscal 2017, the Company adopted ASU No. 2016-09, *Improvements to Employee Share-based Payment Accounting*, which changes among other things, how the tax effects of share-based awards are recognized. ASU No. 2016-09 requires excess tax benefits and tax deficiencies to be recognized in the provision for income taxes as discrete items in the period when the awards vest or are settled, whereas previously such income tax effects were generally recorded as part of additional paid-in capital. The provision for income taxes for the three and nine months ended September 30, 2017, included excess tax benefits of \$19.7 million and \$82.9 million, respectively, that reduced the Company's effective tax rate by 6.8 and 10.9 percentage points, respectively. The recognized excess tax benefits resulted from share-based compensation awards primarily associated with employee equity plans that were vested or settled in the three and nine months ended September 30, 2017. This ASU also eliminates the requirement to reclassify cash flows related to excess tax benefits from operating activities to financing activities on the consolidated statements of cash flows. The Company adopted this provision retrospectively by reclassifying \$39.5 million of excess tax benefits from financing activities to operating activities for the nine months ended September 30, 2016. The Company also excluded the related tax benefits when applying the treasury stock method for computing diluted shares outstanding on a prospective basis as required by this ASU. In addition, the Company elected to continue its current practice of estimating expected forfeitures. The amount of excess tax benefits and deficiencies recognized in the provision for income taxes will fluctuate from period to period based on the price of the Company's stock, the volume of share-based instruments settled or vested, and the value assigned to share-based instruments under U.S. GAAP.

Significant Accounting Policies

There have been no new or material changes to the significant accounting policies discussed in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2016, that are of significance, or potential significance to the Company. The information provided below related to the Company's allowance for sales returns and doubtful accounts policies provide additional clarification on the Company's policy of accounting for arrangements with rights of return that occurred during the first quarter of 2017.

Allowance for Sales Returns and Doubtful Accounts

The allowance for sales returns is based on the Company's estimate of potential future product returns and other allowances related to current period product revenue. The Company analyzes historical returns, current economic trends, and changes in customer demand and acceptance of the Company's products. The allowance for doubtful accounts is based on the Company's assessment of the collectability of customer accounts. The Company regularly reviews the allowance by considering factors such as historical experience, credit quality, the age of the accounts receivable balances, and current economic conditions that may affect a customer's ability to pay.

The Company offered certain customers who purchased surgical systems in the first quarter of fiscal 2017 the opportunity to return such systems and receive a credit toward the purchase of the *da Vinci X* surgical system launched in the second quarter of 2017. In accordance with the guidance relating to the accounting for arrangements in which return rights exist, revenue and associated costs equal to the Company's estimate of the amount of product that will be returned in a future period was deferred. A total of \$23.4 million and \$8.1 million of revenue and product costs, respectively, related to shipments made in the first quarter of 2017, were deferred from recognition in the Company's first quarter Financial Statements. Subject to meeting all other criteria of the Company's revenue recognition policy, the revenue and product cost deferred will be recognized at the date the trade-out rights are exercised by the customers or at the expiration of unexercised rights, which the Company anticipates to be substantially completed prior to the end of 2017. During the three months ended September 30, 2017, the Company recognized \$21.3 million and \$7.3 million of previously deferred revenue and product costs, respectively, as a result of those offers having expired unexercised. As of September 30, 2017, a total of \$2.1 million and \$0.8 million of revenue and product costs, respectively, remained deferred related to this program.

NOTE 3. FINANCIAL INSTRUMENTS

Cash, Cash Equivalents, and Investments

The following tables summarize the Company's cash and available-for-sale marketable securities' amortized cost, gross unrealized gains, gross unrealized losses, and fair value by significant investment category reported as cash and cash equivalents, short-term, or long-term investments as of September 30, 2017, and December 31, 2016 (in millions):

Subtotal	3,384.0	1.2	(11.4)	3,373.8	38.6	1,349.6	1,985.6
Total assets measured at fair value	\$ 4,850.0	\$ 1.3	\$ (13.4)	\$ 4,837.9	\$ 1,036.6	\$ 1,518.0	\$ 2,283.3

The following table summarizes the contractual maturities of the Company's cash equivalents and available-for-sale investments (excluding cash and money market funds), as of September 30, 2017 (in millions):

	Amortized Cost	Fair Value
Mature in less than one year	\$ 1,304.9	\$ 1,303.9
Mature in one to five years	1,660.3	1,655.2
Total	\$ 2,965.2	\$ 2,959.1

Actual maturities may differ from contractual maturities because certain borrowers have the right to call or prepay certain obligations. Realized gains and losses, recognized on the sale of investments, were not material for any of the periods presented. There were no transfers between Level 1 and Level 2 measurements during the nine months ended September 30, 2017, and there were no changes in the valuation techniques used by the Company.

Foreign Currency Derivatives

The objective of the Company's hedging program is to mitigate the impact of changes in currency exchange rates on cash flow from foreign currency denominated sales, expenses, intercompany balances, and other monetary assets or liabilities denominated in currencies other than the U.S. dollar ("USD"). The terms of the Company's derivative contracts are generally twelve months or shorter. The derivative assets and liabilities are measured using Level 2 fair value inputs.

Cash Flow Hedges

The Company enters into currency forward contracts as cash flow hedges to hedge certain forecasted revenue transactions denominated in currencies other than the USD, primarily the European Euro ("EUR"), the British Pound ("GBP"), the Japanese Yen ("JPY"), and the Korean Won ("KRW"). The Company also enters into currency forward contracts as cash flow hedges to hedge certain forecasted expense transactions denominated in EUR and the Swiss Franc ("CHF").

For these derivatives, the Company reports the after-tax gain or loss from the hedge as a component of accumulated other comprehensive gain (loss) in stockholders' equity and reclassifies it into earnings in the same period in which the hedged transaction affects earnings. The amounts reclassified to revenue and expenses related to the hedged transactions and the ineffective portions of cash flow hedges were not material for the periods presented.

Other Derivatives Not Designated as Hedging Instruments

Other derivatives not designated as hedging instruments consist primarily of forward contracts that the Company uses to hedge intercompany balances and other monetary assets or liabilities denominated in currencies other than the USD, primarily the EUR, GBP, JPY, KRW, and CHF. The net gains (losses) recognized in interest and other income, net in the condensed consolidated statements of comprehensive income for the three and nine months ended September 30, 2017, and 2016, were not material.

The notional amounts for derivative instruments provide one measure of the transaction volume. Total gross notional amounts (in USD) for outstanding derivatives and aggregate gross fair value at the end of each period were as follows (in millions):

	Derivatives Designated as Hedging Instruments		Derivatives Not Designated as Hedging Instruments	
	September 30, 2017	December 31, 2016	September 30, 2017	December 31, 2016
Notional amounts:				
Forward contracts	\$ 130.0	\$ 109.7	\$ 122.5	\$ 143.7
Gross fair value recorded in:				
Prepays and other current assets	\$ 1.6	\$ 6.2	\$ 1.7	\$ 5.6
Other accrued liabilities	\$ 4.1	\$ 1.0	\$ 2.5	\$ 0.6

NOTE 4. BALANCE SHEET DETAILS AND OTHER FINANCIAL INFORMATION

Inventory

The following table provides further details of inventory (in millions):

	As of	
	September 30, 2017	December 31, 2016
Raw materials	\$ 67.7	\$ 54.8
Work-in-process	18.5	13.4
Finished goods	139.0	114.1
Total inventory	\$ 225.2	\$ 182.3

Supplemental Cash Flow Information

The following table provides supplemental non-cash investing activities (in millions):

	Nine Months Ended September 30,	
	2017	2016
Equipment transfers, including operating lease assets, from inventory to property, plant and equipment	\$ 45.1	\$ 31.1

NOTE 5. LEASE RECEIVABLES

Lease receivables relating to sales-type lease arrangements are presented on the Condensed Consolidated Balance Sheets as follows (in millions):

	As of	
	September 30, 2017	December 31, 2016
Gross lease receivable	\$ 113.0	\$ 104.3
Unearned income	(4.7)	(4.8)
Allowance for credit loss	(0.8)	(0.6)
Net investment in sales-type leases	107.5	98.9
Reported as:		
Prepays and other current assets	35.0	29.8
Intangible and other assets, net	72.5	69.1
Total, net	\$ 107.5	\$ 98.9

Contractual maturities of gross lease receivables at September 30, 2017, are as follows (in millions):

	Amount
2017	\$ 9.3
2018	38.0
2019	29.8
2020	19.5
2021	11.2
2022 and thereafter	5.2
Total	\$ 113.0

NOTE 6. CONTINGENCIES

The Company is involved in a variety of claims, lawsuits, investigations and proceedings relating to securities laws, product liability, intellectual property, insurance, contract disputes, employment, and other matters. Certain of these lawsuits and claims are described in further detail below. It is not possible to predict what the outcome of these matters will be and the Company cannot guarantee that any resolution will be reached on commercially reasonable terms, if at all.

A liability and related charge to earnings are recorded in the Company's Financial Statements for legal contingencies when the loss is considered probable and the amount can be reasonably estimated. The assessment is reevaluated each accounting period and is based on all available information, including impact of negotiations, settlements, rulings, advice of legal counsel, and other information and events pertaining to each case. Nevertheless, it is possible that additional future legal costs (including settlements, judgments, legal fees, and other related defense costs) could have a material adverse effect on the Company's business, financial position, or future results of operations.

Purported Shareholder Class Action Lawsuits filed April 26, 2013, and May 24, 2013

On April 26, 2013, a purported class action lawsuit entitled *Abrams v. Intuitive Surgical, et al.*, No. 5-13-cv-1920, was filed against a number of the Company's current and former officers and directors in the United States District Court for the Northern District of California. A substantially identical complaint, entitled *Adel v. Intuitive Surgical, et al.*, No. 5:13-cv-02365, was filed in the same court against the same defendants on May 24, 2013. The Adel case was voluntarily dismissed without prejudice on August 20, 2013.

On October 15, 2013, plaintiffs in the Abrams matter filed an amended complaint. The case has since been retitled *In re Intuitive Surgical Securities Litigation*, No. 5:13-cv-1920. The plaintiffs seek unspecified damages on behalf of a putative class of persons who purchased or otherwise acquired the Company's common stock between February 6, 2012, and July 18, 2013. The amended complaint alleges that the defendants violated federal securities laws by allegedly making false and misleading statements and omitting certain material facts in certain public statements and in the Company's filings with the SEC. On November 18, 2013, the court appointed the Employees' Retirement System of the State of Hawaii as lead plaintiff and appointed lead counsel. The Company filed a motion to dismiss the amended complaint on December 16, 2013, which was granted in part and denied in part on August 21, 2014. The plaintiffs elected not to further amend their complaint at that time. On October 22, 2014, the court granted the Company's motion for leave to file a motion for reconsideration of the court's August 21, 2014, order. The Company filed its motion for reconsideration on November 5, 2014. Following opposition and reply briefing, the court denied the motion on December 15, 2014, allowing the case to move forward on the claims that remained. The plaintiffs moved for class certification on September 1, 2015, and following opposition and reply briefing, the court held a hearing on the motion on January 21, 2016. While that motion remained pending, on October 11, 2016, the Company sent plaintiffs' lead counsel, Labaton Sucharow LLP, a letter enclosing a draft motion for sanctions pursuant to Federal Rule of Civil Procedure 11, primarily based on statements to the court that lacked a proper factual basis. In response, on November 1, 2016, plaintiffs' local counsel withdrew from the case entirely and withdrew their signatures from the disputed pleadings. On November 2, 2016, Labaton Sucharow LLP filed a motion for leave to file an amended complaint that did not include the disputed statements. On November 16, 2016, the Company filed an opposition to plaintiffs' motion, along with an independent motion to strike the amended complaint and the pleadings from which plaintiffs' local counsel withdrew their signatures. Following additional briefing, the motion for leave to amend and motion to strike were fully submitted to the court on November 23, 2016, and December 7, 2016, respectively. On December 22, 2016, the court entered an order granting plaintiffs' motion for class certification. On January 5, 2017, the Company filed a Petition for Permission to Appeal from the order granting class certification in the U.S. Court of Appeals for the Ninth Circuit. The court of appeals has not yet ruled on the Company's petition. On January 12, 2017, plaintiffs sought leave to file a motion for partial reconsideration of the court's class certification order, which the court granted on March 17, 2017. Plaintiffs filed the motion for reconsideration itself on April 3, 2017, and the Company filed its opposition on April 17, 2017. The court denied the motion on September 29, 2017. On January 25, 2017, the court entered an order granting plaintiffs' motion for leave to amend the complaint and denying the Company's motion to strike. On February 9, 2017, the Company moved to dismiss the amended complaint. Following opposition and reply briefing, the matter was fully submitted to the court on March 2, 2017. The court denied the motion on September 29,

2017. On July 13, 2017, the parties filed a stipulation vacating the case schedule, which the court entered on July 14, 2017. On October 11, 2017, the court scheduled a trial setting conference for November 16, 2017. Based on currently available information, the Company does not believe the resolution of this matter will have a material adverse effect on the Company's business, financial position, or future results of operations.

Purported Derivative Actions filed on February 3, 2014, February 21, 2014, March 21, 2014, June 3, 2014, and March 5, 2015

On February 3, 2014, an alleged stockholder, Robert Berg, caused a purported stockholder's derivative lawsuit entitled *Berg v. Guthart et al.*, No. 4:14-CV-00515, to be filed in the United States District Court for the Northern District of California. The lawsuit names the Company as a nominal defendant and names a number of the Company's current and former officers and directors as defendants. The plaintiff seeks to recover, on the Company's behalf, unspecified damages purportedly sustained by the Company in connection with allegedly misleading statements and/or omissions made in connection with the Company's financial reporting for the period between 2012 and early 2014. The plaintiff also seeks a series of changes to the Company's corporate governance policies and an award of attorneys' fees. On April 3, 2014, the case was related to *In re Intuitive Surgical Securities Litigation*. On July 30, 2014, the court granted Berg's motion to be appointed lead plaintiff, denied the City of Birmingham's motion seeking such appointment (see below for additional description), and retitled the matter *In re Intuitive Surgical, Inc. Shareholder Derivative Litigation*, No. 4:14-CV-00515. On August 13, 2014, the plaintiffs filed a consolidated complaint, making allegations substantially similar to the allegations in the original complaint. On September 12, 2014, the Company filed a motion to dismiss the consolidated complaint. The plaintiffs filed an opposition on October 9, 2014, and the Company filed its reply on October 30, 2014. The court denied the Company's motion to dismiss on November 16, 2015. On January 26, 2016, the Company moved to stay this lawsuit in favor of *Public School Teachers' Pension and Retirement Fund of Chicago v. Guthart et al.* (see below for additional description). Plaintiff opposed the motion to stay on February 16, 2016, the Company filed its reply on March 1, 2016, and a hearing was set for June 16, 2016. While the motion was pending, however, the Company and the plaintiff agreed in principle that the plaintiff would file a motion to intervene in the *Public School Teachers' Pension and Retirement Fund of Chicago* action and withdraw his opposition to the motion to stay. On March 17, 2016, the parties jointly requested that the court not rule on the motion to stay while the agreement was being implemented. Following additional negotiations, the plaintiff filed an unopposed motion to intervene on April 29, 2016. After additional briefing, on May 23, 2016, the court in the *Public School Teachers' Pension and Retirement Fund of Chicago* action granted the motion. Accordingly, on May 31, 2016, the parties filed a stipulation requesting that the court stay *In re Intuitive Surgical, Inc. Shareholder Derivative Litigation*. The court granted the stay on June 2, 2016. Additional discussions between the parties ensued, and on September 15, 2016, they executed a confidential Memorandum of Understanding that contained the essential terms of a settlement to which the parties agreed in principle. That settlement, as later finalized, provides for a dismissal with prejudice and release of all claims brought in both the *In re Intuitive Surgical, Inc. Shareholder Derivative Litigation* action and the *Public School Teachers' Pension and Retirement Fund of Chicago* action, as well as *City of Plantation Police Officers' Employees' Retirement System v. Guthart et al.* (see below for additional description). The settlement, which also includes terms that require the Company to reimburse the plaintiffs' lawyers' legal fees, is subject to court approval as described below. In the interim, the *In re Intuitive Surgical, Inc. Shareholder Derivative Litigation* action remains stayed. Based on currently available information, the Company does not believe the resolution of this matter will have a material adverse effect on the Company's business, financial position, or future results of operations.

On February 21, 2014, a second alleged stockholder caused a substantially similar purported stockholder's derivative lawsuit entitled *Public School Teachers' Pension and Retirement Fund of Chicago v. Guthart et al.*, No. CIV 526930, to be filed in the Superior Court of the State of California, County of San Mateo, against the same parties and seeking the same relief. On March 26, 2014, the case was removed to the United States District Court for the Northern District of California, where it was related to *In re Intuitive Surgical Securities Litigation* and *Berg v. Guthart* on April 30, 2014. The district court remanded the case back to San Mateo County Superior Court on June 30, 2014. On August 28, 2014, the Company filed a motion seeking to stay the case in favor of the federal action and asking that the plaintiff be required to post a bond on the grounds that the action was duplicative and was not in the Company's best interests. On November 13, 2014, the superior court entered an order denying in part the Company's motion to stay and denying the Company's request for plaintiff's bond. On November 18, 2014, the Company petitioned the First Appellate District of the California, Court of Appeal for a writ of mandate directing the superior court to stay the case in its entirety. At the same time, the Company requested an immediate stay of proceedings pending resolution of the petition. On November 19, 2014, the court of appeal granted the Company's request for an immediate stay of the proceedings and set a briefing schedule for the petition. The plaintiff filed its opposition to the petition on December 8, 2014, and the Company filed its reply on December 22, 2014. The petition was denied on January 8, 2015. On January 20, 2015, the Company filed a demurrer (moved to dismiss the complaint). The plaintiff filed its opposition to the demurrer on February 10, 2015, and the Company filed its reply on February 20, 2015. A hearing was held on February 27, 2015, and the court overruled the demurrer on March 27, 2015. The court's order was entered on April 2, 2015. On June 19, 2015, the Company moved for summary judgment, and a hearing on the Company's motion was set for September 4, 2015. On July 6, 2015, the court amended the case schedule, and the Company withdrew its motion for summary judgment. The court later further amended the case schedule, and trial was eventually reset for

September 16, 2016. On May 23, 2016, the court granted an unopposed motion to intervene filed by the plaintiffs in *In re Intuitive Surgical, Inc. Shareholder Derivative Litigation* and *City of Birmingham Relief and Retirement System v. Guthart et al.* (see above and below for additional description). The Company filed a new motion for summary judgment on June 1, 2016, and the plaintiff filed a motion for summary adjudication regarding certain affirmative defenses on June 2, 2016. Following opposition and reply briefing, the court heard argument on the motions for summary judgment and summary adjudication on August 24, 2016. While the motions were pending, on September 15, 2016, the parties executed the confidential Memorandum of Understanding described above, which contained the essential terms of a settlement to which the parties agreed in principle. The parties notified the court of the Memorandum of Understanding on September 15, 2016, and on September 16, 2016, the court entered an order vacating the trial date and ruling that the motions for summary judgment and summary adjudication (along with other pre-trial motions) were moot. The parties finalized the settlement over the ensuing months, appearing before the court periodically to keep it apprised of their progress. The final settlement provides for a dismissal with prejudice and release of all claims brought in the *Public School Teachers' Pension and Retirement Fund of Chicago* action, as well as the *In re Intuitive Surgical, Inc. Shareholder Derivative Litigation* action and the *City of Plantation Police Officers' Employees' Retirement System* action and the other similar derivative cases (see above and below, respectively, for additional description). The settlement also includes terms that require the Company to reimburse the plaintiffs' lawyers' legal fees. On July 7, 2017, the plaintiff filed a motion for preliminary approval of the settlement, and on July 18, 2017, the Company filed a statement of non-opposition. On August 9, 2017, the court entered an order preliminarily approving settlement, providing for notice to the Company's shareholders, and setting a final settlement hearing. On October 20, 2017, the final settlement was approved by the court. During the three and nine months ended September 30, 2017, the Company recorded \$8.7 million and \$11.7 million, respectively, of pre-tax charges to reflect the estimated cost of settling this matter. As of September 30, 2017, a total of \$16.7 million was included in other accrued liabilities in the accompanying Consolidated Balance Sheets related to this settlement.

On March 21, 2014, a third alleged stockholder caused a substantially similar purported stockholder's derivative lawsuit entitled *City of Birmingham Relief and Retirement System v. Guthart et al.*, No. 5-14-CV-01307, to be filed in the United States District Court for the Northern District of California against the same parties and seeking the same relief. On April 8, 2014, the lawsuit was related to *In re Intuitive Surgical Securities Litigation* and *Berg v. Guthart*. On July 30, 2014, the court consolidated the case with *Berg v. Guthart* and, as noted above, granted Berg's motion to be appointed lead plaintiff and denied the City of Birmingham's motion seeking such appointment. Accordingly, the *City of Birmingham Relief and Retirement System* action will be resolved by the pending settlement of the *In re Intuitive Surgical, Inc. Shareholder Derivative Litigation* action (see above for additional description). Based on currently available information, the Company does not believe the resolution of this matter will have a material adverse effect on the Company's business, financial position, or future results of operations.

On June 3, 2014, a fourth alleged stockholder caused a substantially similar purported stockholder's derivative lawsuit entitled *City of Plantation Police Officers' Employees' Retirement System v. Guthart et al.*, C.A. No. 9726-CB, to be filed in the Court of Chancery of the State of Delaware. The Company filed a motion to stay proceedings in favor of the earlier-filed stockholder derivative lawsuits pending in federal and state courts in California. In light of the Company's motion, the plaintiff agreed to a stay of all proceedings in the case in favor of the earlier-filed actions. While the case was stayed, the parties agreed that the plaintiff would file a motion to intervene in the *Public School Teachers' Pension and Retirement Fund of Chicago* action (see above for additional description). The plaintiff filed an unopposed motion to intervene on April 29, 2016. After additional briefing, on May 23, 2016, the court in the *Public School Teachers' Pension and Retirement Fund of Chicago* action granted the plaintiff's motion. However, on June 21, 2016, in response to discovery requests, the plaintiff admitted that it did not continuously hold the Company's stock during all relevant times. Accordingly, on July 21, 2016, the plaintiff filed a request for dismissal as an additional plaintiff in the *Public School Teachers' Pension and Retirement Fund of Chicago* action, which the court in that action granted with prejudice on July 22, 2016. On September 15, 2016, the parties executed the confidential Memorandum of Understanding described above, which contained the essential terms of a settlement to which the parties agreed in principle. That settlement, as later finalized, provides for a dismissal with prejudice and release of all claims brought in the *City of Plantation Police Officers' Employees' Retirement System* action, as well as both the *In re Intuitive Surgical, Inc. Shareholder Derivative Litigation* action and the *Public School Teachers' Pension and Retirement Fund of Chicago* action (see above for additional description). The settlement, which also includes terms that require the Company to reimburse the plaintiffs' lawyers' legal fees, is subject to court approval as described above. In the interim, the *City of Plantation Police Officers' Employees' Retirement System* action remains stayed. Based on currently available information, the Company does not believe the resolution of this matter will have a material adverse effect on the Company's business, financial position, or future results of operations.

On March 5, 2015, a fifth alleged stockholder caused a substantially similar purported stockholder's derivative lawsuit entitled *Back v. Guthart et al.*, No. 3:15-CV-01037, to be filed in the United States District Court for the Northern District of California. On April 7, 2015, the lawsuit was related to *In re Intuitive Surgical Securities Litigation* and *Berg v. Guthart*. The Company filed a motion to dismiss the complaint on July 10, 2015. On August 13, 2015, the parties stipulated to a complete stay of the matter and the court entered an order reflecting the stay on August 17, 2015. On September 11, 2017, the plaintiff filed a motion to lift the stay and reopen the case and for leave to file amended complaint. On September 25, 2017, the individual defendants filed an opposition to plaintiffs' motion, which the Company joined on September 26, 2017. Plaintiff filed his reply October 2, 2017, and

the Court has set a hearing for January 25, 2018. The Company believes the settlement of the cases described above will make this motion and the action itself moot and will move for dismissal on that basis. Based on currently available information, the Company does not believe the resolution of this matter will have a material adverse effect on the Company's business, financial position, or future results of operations.

Product Liability Litigation

The Company is currently named as a defendant in approximately 45 individual product liability lawsuits filed in various state and federal courts by plaintiffs who allege that they or a family member underwent surgical procedures that utilized the *da Vinci* Surgical System and sustained a variety of personal injuries and, in some cases death as a result of such surgery. The Company has also received a large number of product liability claims from plaintiffs' attorneys, many of which are subject to certain tolling agreements further discussed below. The Company has also been named as a defendant in a multi-plaintiff lawsuit filed in Missouri state court. In total, plaintiffs in that case seek damages on behalf of 55 patients from 22 different states who had surgeries in which their surgeons used the *da Vinci* Surgical System. Several of the filed cases have trial dates in the next 12 months.

The cases raise a variety of allegations including, to varying degrees, that plaintiffs' injuries resulted from purported defects in the *da Vinci* Surgical System and/or failure on the Company's part to provide adequate training resources to the healthcare professionals who performed plaintiffs' surgeries. The cases further allege that the Company failed to adequately disclose and/or misrepresented the potential risks and/or benefits of the *da Vinci* Surgical System. Plaintiffs also assert a variety of causes of action, including for example, strict liability based on purported design defects, negligence, fraud, breach of express and implied warranties, unjust enrichment, and loss of consortium. Plaintiffs seek recovery for alleged personal injuries and, in many cases, punitive damages.

Plaintiffs' attorneys have also engaged in well-funded national advertising efforts seeking patients dissatisfied with surgery utilizing the *da Vinci* Surgical System. The Company has received a significant number of such claims from plaintiffs' attorneys that it believes are a result of these advertising efforts. A substantial number of claims relate to alleged complications from surgeries performed with certain versions of Monopolar Curved Scissor ("MCS") instruments which included an MCS tip cover accessory that was the subject of a market withdrawal in 2012 and MCS instruments that were the subject of a recall in 2013. In an effort to avoid the expense and distraction of defending multiple lawsuits, the Company entered into tolling agreements to pause the applicable statutes of limitations for many of these claims and engaged in confidential mediation efforts.

After an extended confidential mediation process with legal counsel for many of the claimants covered by the tolling agreements, the Company determined during 2014 that, while it denies any and all liability, in light of the costs and risks of litigation, settlement of certain claims was appropriate. During the three months ended September 30, 2017, and 2016, no significant charges were recorded related to these claims. During the nine months ended September 30, 2017, and 2016, the Company recorded \$15.6 million and \$6.3 million, respectively, of pre-tax charges to reflect the estimated cost of settling a number of the product liability claims covered by the tolling agreements. The Company has reached confidential settlements in many of the cases that were in the confidential mediation process and earlier filed cases.

The Company's estimate of the anticipated cost of resolving these claims is based on negotiations with attorneys for claimants who have participated in the mediation process. Nonetheless, it is possible that more claims will be made by additional individuals and that the claimants whose claims were not resolved through the mediation program, as well as those claimants who have not participated in mediations, will choose to pursue greater amounts in a court of law. Consequently, the final outcome of these claims is dependent on many variables that are difficult to predict and the ultimate cost associated with these product liability claims may be materially different than the amount of the current estimate and accruals and could have a material adverse effect on the Company's business, financial position, and future results of operations. Although there is a reasonable possibility that a loss in excess of the amount recognized exists, the Company is unable to estimate the possible loss or range of loss in excess of the amount recognized at this time. As of September 30, 2017, and December 31, 2016, a total of \$18.4 million and \$20.5 million, respectively, were included in other accrued liabilities in the accompanying Consolidated Balance Sheets related to the tolled product liability claims.

In February 2011, the Company was named as a defendant in a product liability action that had originally been filed in Washington State Superior Court for Kitsap County against the healthcare providers and hospital involved in a decedent's surgery on such decedent's behalf (*Josette Taylor, as Personal Representative of the Estate of Fred E. Taylor, deceased; and on behalf of the Estate of Fred E. Taylor v. Intuitive Surgical, Inc.*, No. 09-2-03136-5). In *Taylor*, plaintiff asserted wrongful death and product liability claims against the Company, generally alleging that the decedent died four years after surgery as a result of injuries purportedly suffered during the surgery, which was conducted with the use of the *da Vinci* Surgical System. The plaintiff in *Taylor* asserted that such injuries were caused, in whole or in part, by the Company's purported failure to properly train, warn, and instruct the surgeon. The lawsuit sought unspecified damages for past medical expenses, pain and suffering, loss of consortium as well as punitive damages. A trial commenced on April 15, 2013. On May 23, 2013, the jury returned a defense verdict, finding that the Company was not negligent. Judgment was entered in the Company's favor on June 7, 2013. Subsequent to the verdict, the plaintiff filed a notice of appeal. That appeal was denied on July 7, 2015. On July 27, 2015, plaintiff filed a motion for reconsideration

with the court of appeal; the court of appeal denied the motion for reconsideration on August 10, 2015. On September 9, 2015, plaintiff filed a Petition for Review with the Washington State Supreme Court (“Washington Supreme Court”). On February 10, 2016, the Washington Supreme Court issued an order granting the plaintiff’s Petition for Review. Oral argument on the appeal before the Washington Supreme Court was heard on June 7, 2016. On February 9, 2017, the Washington Supreme Court vacated the defense verdict and remanded the case for retrial, which is currently scheduled to begin on February 12, 2018. Based on currently available information, the Company does not believe the resolution of this matter will have a material adverse effect on the Company’s business, financial position, or future results of operations.

Patent Litigation

On June 30, 2017, Ethicon LLC., Ethicon Endo-Surgery, Inc., and Ethicon US LLC (collectively, “Ethicon”) filed a complaint for patent infringement against the Company in the United States District Court for the District of Delaware. The complaint, which was served on the Company on July 12, 2017, alleges that the Company’s *EndoWrist* Stapler instruments infringe several of Ethicon’s patents. Based on currently available information, the Company is unable to make a reasonable estimate of loss or range of losses, if any, arising from this matter.

NOTE 7. STOCKHOLDERS’ EQUITY

Stock Repurchase Program

The Company’s Board of Directors (the “Board”) has authorized an aggregate of \$6.2 billion of funding for the Company’s common stock repurchase program (the “Repurchase Program”) since its establishment in March 2009. The most recent authorization occurred in December 2016 when the Board increased the authorized amount available under Repurchase Program to \$3.0 billion. As of September 30, 2017, the remaining amount of share repurchases authorized by the Board was approximately \$991.6 million.

On January 24, 2017, the Company entered into an accelerated share repurchase program (the “ASR Program”) with Goldman, Sachs & Co. (“Goldman”) to repurchase \$2.0 billion of the Company’s common stock. On January 27, 2017, the Company made a payment of \$2.0 billion to Goldman and Goldman delivered to the Company an initial delivery of approximately 7.3 million shares of the Company’s common stock with an aggregate market value of approximately \$1.6 billion on the date of the transaction, which was accounted as a reduction to common stock and additional paid-in capital by an aggregate of \$152.0 million and \$1,448.0 million to retained earnings. The remaining \$400.0 million was recorded as a forward contract as a reduction to additional paid-in capital. The Company reflects the ASR Program as a repurchase of common stock in the period delivered for purposes of calculating earnings per share and as a forward contract indexed to its own common stock.

The total number of shares that the Company will repurchase under the ASR Program will be based generally on the daily volume-weighted average price per share of the Company’s common stock during the repurchase period, less a discount. Depending on the circumstances at settlement, Goldman may be required to deliver additional shares of common stock to the Company or the Company may be required either to deliver shares of common stock or make a cash payment to Goldman. Final settlement of the ASR Program is scheduled to be completed by the fourth quarter of 2017, although the completion date may be accelerated at Goldman’s option.

The Company repurchased approximately 47,000 shares of the Company’s common stock in the open market during the nine months ended September 30, 2016. There were no shares repurchased during the three month periods ended September 30, 2017, and 2016. The following table provides the share repurchase activities during the nine months ended September 30, 2017, and 2016 (in millions, except per share amounts):

	Nine Months Ended September 30,	
	2017	2016
Shares repurchased	7.3	—
Average price per share	(a) \$	172.18
Value of shares repurchased	(a) \$	8.1

(a) The number of shares repurchased represents shares delivered during the nine months ended September 30, 2017, and does not represent the final number of shares to be delivered under the ASR Program. Therefore, the average price paid per share will be determined at the end of the applicable purchase period.

Accumulated Other Comprehensive Income (Loss)

The components of accumulated other comprehensive income (loss), net of tax, for the three and nine months ended September 30, 2017, and 2016, are as follows (in millions):

	Three Months Ended September 30, 2017				
	Gains (Losses) on Hedge Instruments	Unrealized Gains (Losses) on Available-for-Sale Securities	Foreign Currency Translation Gains (Losses)	Employee Benefit Plans	Total

NOTE 8. SHARE-BASED COMPENSATION

In April 2017, the Company's shareholders approved an amended and restated 2000 Employee Stock Purchase Plan (the "ESPP") to provide for an increase in the number of shares of common stock reserved for issuance from 2,030,105 to 2,530,105 (or, after giving effect to the Stock Split, 6,090,315 to 7,590,315). The Company's shareholders also approved an amended and restated 2010 Incentive Award Plan ("2010 Plan") to provide for an increase in the number of shares of common stock reserved for issuance from 7,050,000 to 8,150,000 (or, after giving effect to the Stock Split, 21,150,000 to 24,450,000). As of September 30, 2017, approximately 6.3 million shares of common stock were reserved for future issuance under the Company's stock plans. A maximum of approximately 2.7 million of these shares can be awarded as restricted stock units ("RSUs").

Stock Option Information

A summary of stock option activity under all stock plans for the nine months ended September 30, 2017, is presented as follows (in millions, except per share amounts):

	Stock Options Outstanding	
	Number Outstanding	Weighted Average Exercise Price Per Share
Balance at December 31, 2016	9.3	\$ 148.36
Options granted	0.7	\$ 282.99
Options exercised	(2.5)	\$ 140.31
Options forfeited/expired	(0.1)	\$ 193.50
Balance at September 30, 2017	7.4	\$ 162.90

As of September 30, 2017, options to purchase an aggregate of 5.6 million shares of common stock were exercisable at a weighted-average price of \$145.37 per share.

Restricted Stock Units Information

A summary of RSU activity for the nine months ended September 30, 2017, is presented as follows (in millions, except per share amounts):

	Shares	Weighted Average Grant Date Fair Value
Unvested balance at December 31, 2016	1.8	\$ 174.72
Granted	1.0	\$ 245.40
Vested	(0.5)	\$ 170.58
Forfeited	(0.1)	\$ 200.82
Unvested balance at September 30, 2017	2.2	\$ 207.09

Employee Stock Purchase Plan

Under the ESPP, employees purchased approximately 0.2 million shares for \$38.3 million and 0.2 million shares for \$32.5 million during the nine months ended September 30, 2017, and 2016, respectively.

Share-based Compensation Expense

The following table summarizes share-based compensation expense for the three and nine months ended September 30, 2017, and 2016 (in millions):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2017	2016	2017	2016
Cost of sales - products	\$ 7.0	\$ 6.9	\$ 20.5	\$ 18.6
Cost of sales - services	3.7	3.3	10.4	9.4
Total cost of sales	10.7	10.2	30.9	28.0
Selling, general and administrative	30.0	25.3	82.3	72.9
Research and development	15.2	11.4	40.9	31.5
Share-based compensation expense before income taxes	55.9	46.9	154.1	132.4
Income tax benefit	18.4	14.8	50.3	41.5
Share-based compensation expense after income taxes	\$ 37.5	\$ 32.1	\$ 103.8	\$ 90.9

The Black-Scholes option pricing model is used to estimate the fair value of stock options granted under the Company's share-based compensation plans and rights to acquire stock granted under the Company's ESPP. The weighted average estimated fair values of stock options, the rights to acquire stock granted, and the weighted average assumptions used in calculating those fair values were as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2017	2016	2017	2016
Stock Option Plans				
Risk free interest rate	1.7%	1.0%	1.8%	1.1%
Expected term (in years)	3.9	3.9	4.1	4.2
Expected volatility	26%	24%	25%	27%
Weighted average fair value at grant date	\$ 74.37	\$ 47.32	\$ 65.12	\$ 46.90
Employee Stock Purchase Plan				
Risk free interest rate	1.2%	0.5%	1.2%	0.6%
Expected term (in years)	1.2	1.2	1.2	1.2
Expected volatility	29%	27%	28%	30%
Weighted average fair value at grant date	\$ 85.23	\$ 61.14	\$ 79.77	\$ 57.57

NOTE 9. INCOME TAXES

Income tax (benefit) expense for the three months ended September 30, 2017, was \$(8.1) million, or (2.8)% of income before taxes, compared with \$55.8 million, or 20.9% of income before taxes for the three months ended September 30, 2016. Income tax expense for the nine months ended September 30, 2017, was \$58.4 million, or 7.7% of income before taxes, compared with \$172.8 million, or 24.5% of income before taxes for the nine months ended September 30, 2016. The Company's income tax provision

for the three and nine months ended September 30, 2017, compared with the same periods of 2016, primarily benefited from the expiration of statutes of limitations and excess tax benefits recognized under ASU No. 2016-09, *Improvements to Employee Share-based Payment Accounting*. Also, the Company's effective tax rates for these periods differ from the U.S. federal statutory rate of 35% due to the effect of income earned by certain of the Company's overseas entities being taxed at rates lower than the federal statutory rate, partially offset by state income taxes. The Company intends to indefinitely reinvest outside the U.S. all of its undistributed foreign earnings that were not previously subject to U.S. tax.

The effective tax rates for the three and nine months ended September 30, 2017, reflected a \$14.9 million tax benefit mainly related to the release of unrecognized tax benefits due to the expiration of statutes of limitations in various jurisdictions. The effective tax rates for the three and nine months ended September 30, 2017, also reflected tax benefit of \$53.5 million and \$45.7 million, respectively, from reevaluation of certain unrecognized tax benefits as a result of the expiration of such statutes of limitations.

The Company adopted ASU No. 2016-09 in the first quarter of 2017, which resulted in excess tax benefits associated with employee equity plans of \$19.7 million and \$82.9 million being recognized in the income tax provision during the three and nine months ended September 30, 2017, respectively. Excess tax benefits associated with employee equity plans was previously recorded in additional paid-in capital and the adoption of this ASU resulted in reducing the Company's effective tax rate by 6.8 percentage points and 10.9 percentage points for the three and nine months ended September 30, 2017, respectively. The amount of excess tax benefits or deficiencies will fluctuate from period to period based on the price of the Company's stock, the volume of share-based instruments settled or vested, and the value assigned to employee equity awards under U.S. GAAP.

As of September 30, 2017, the Company had total gross unrecognized tax benefits of \$62.3 million compared with \$106.0 million as of December 31, 2016, representing a net decrease of approximately \$43.7 million for the nine months ended September 30, 2017. The net decrease is primarily related to the above mentioned reversal of previously unrecognized tax benefits as a result of the expiration of certain statutes of limitations, partially offset by increases during the first nine months of 2017 related to other uncertain tax positions. If recognized, these gross unrecognized tax benefits would reduce the effective tax rate in the period of recognition.

The Company files federal, state, and foreign income tax returns in many U.S. and outside of the U.S. ("OUS") jurisdictions. Years before 2014 are closed for the significant jurisdictions. Certain of the Company's unrecognized tax benefits could change due to activities of various tax authorities, including potential assessment of additional tax, possible settlement of audits, or through normal expiration of various statutes of limitations, which could affect the Company's effective tax rate in the period in which they change.

The Company is subject to the examination of its income tax returns by the Internal Revenue Service and other tax authorities. The outcome of these audits cannot be predicted with certainty. The Company's management regularly assesses the likelihood of adverse outcomes resulting from these examinations to determine the adequacy of the Company's provision for income taxes. If any issues addressed in the Company's tax audits are resolved in a manner not consistent with management's expectations, the Company could be required to adjust its provision for income taxes in the period such resolution occurs.

NOTE 10. NET INCOME PER SHARE

The following table presents the computation of basic and diluted net income per share for the three and nine months ended September 30, 2017, and 2016 (in millions, except per share amounts):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2017	2016	2017	2016
Numerator:				
Net income	\$ 297.5	\$ 211.0	\$ 698.8	\$ 531.9
Denominator:				
Weighted-average shares outstanding used in basic calculation	111.8	116.1	111.6	114.6
Add: dilutive effect of potential common shares	5.0	3.0	4.3	3.0
Weighted-average shares used in computing diluted net income per share	116.8	119.1	115.9	117.6
Net income per share:				
Basic	\$ 2.66	\$ 1.82	\$ 6.26	\$ 4.64
Diluted	\$ 2.55	\$ 1.77	\$ 6.03	\$ 4.52

As the forward contract associated with the ASR Program is presumed to be settled in shares, any dilutive effect of the contingently issuable shares is included in the computation of diluted net income per share. See Note 7 to the Condensed Consolidated Financial Statements (Unaudited) for further details on the ASR Program.

Share-based compensation awards of approximately 0.2 million and 0.3 million weighted-average shares for the three months ended September 30, 2017, and 2016, respectively, and approximately 0.4 million and 0.5 million weighted-average shares for the nine months ended September 30, 2017, and 2016, respectively, were outstanding but were not included in the computation of diluted net income per share because the effect of including such shares would have been anti-dilutive.

ITEM 2. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

In this report, “Intuitive Surgical,” “Intuitive,” the “Company,” “we,” “us,” and “our” refer to Intuitive Surgical, Inc. and its wholly- and majority-owned subsidiaries.

This management’s discussion and analysis of financial condition as of September 30, 2017, and results of operations for the three and nine months ended September 30, 2017, and 2016, should be read in conjunction with management’s discussion and analysis of financial condition and results of operations included in our Annual Report on Form 10-K for the year ended December 31, 2016.

This report contains “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended (the “Exchange Act”). Forward-looking statements relate to expectations concerning matters that are not historical facts. Words such as “estimates,” “projects,” “believes,” “anticipates,” “plans,” “expects,” “intends,” “may,” “will,” “could,” “should,” “would,” “targeted” and similar words and expressions are intended to identify forward-looking statements. These forward-looking statements include, but are not limited to, statements related to our expected business, new product introductions, procedures and procedure adoption, future results of operations, future financial position, our ability to increase our revenues, the anticipated mix of our revenues between product and service revenues, our financing plans and future capital requirements, anticipated costs of revenue, anticipated expenses, our potential tax assets or liabilities, the effect of recent accounting pronouncements, our investments, anticipated cash flows, our ability to finance operations from cash flows and similar matters, and statements based on current expectations, estimates, forecasts and projections about the economies and markets in which we operate and our beliefs and assumptions regarding these economies and markets. These forward-looking statements should be considered in light of various important factors, including the following: the impact of global and regional economic and credit market conditions on health care spending; health care reform legislation in the United States and its impact on hospital spending, reimbursement, insurance deductibles, and fees levied on certain medical device revenues; changes in hospital admissions and actions by payers to limit or manage surgical procedures; timing and success of product development and market acceptance of developed products; the results of any collaborations, in-licensing arrangements, joint ventures, strategic alliances or partnerships; procedure counts; regulatory approvals, clearances and restrictions, or any dispute that may occur with any regulatory body; guidelines and recommendations in the health care and patient communities; intellectual property positions and litigation; competition in the medical device industry and in the specific markets of surgery in which we operate; unanticipated manufacturing disruptions; our ability to meet demand for products; the results of legal proceedings to which we are or may become a party; product liability and other litigation claims; potential adverse publicity regarding our Company, the safety of our products and the adequacy of training; our ability to expand in foreign markets; and other risk factors. Readers are cautioned not to place undue reliance on these forward-looking statements, which are based on current expectations and are subject to risks, uncertainties, and assumptions that are difficult to predict, including those risk factors described throughout this filing and in the Annual Report on Form 10-K for the fiscal year ended December 31, 2016, and other periodic filings with the Securities and Exchange Commission. Our actual results may differ materially and adversely from those expressed in any forward-looking statement. We undertake no obligation to publicly update or release any revisions to these forward-looking statements, except as required by law.

Overview

Open surgery remains the predominant form of surgery and is used in almost every area of the body. However, the large incisions required for open surgery create trauma to patients, typically resulting in longer hospitalization and recovery times, increased hospitalization costs, and additional pain and suffering relative to MIS, where MIS is available. For over three decades, MIS has reduced trauma to patients by allowing selected surgeries to be performed through small ports rather than large incisions. MIS has been widely adopted for certain surgical procedures.

da Vinci Surgical Systems enable surgeons to extend the benefits of MIS to many patients who would otherwise undergo a more invasive surgery by using computational, robotic and imaging technologies to overcome many of the limitations of conventional MIS. Surgeons using a *da Vinci* Surgical System operate while seated comfortably at a console viewing a 3-D representation of an HD image of the surgical field. This immersive visualization connects surgeons to the surgical field and their instruments. While seated at the console, the surgeon manipulates instrument controls in a natural manner, similar to the open surgery technique. Our technology is designed to provide surgeons with a range of motion of MIS instruments in the surgical field analogous to the motions of a human wrist, while filtering out the tremor inherent in a surgeon’s hand. In designing our products, we focus on making our technology easy and safe to use.

Our products fall into four broad categories - the *da Vinci* Surgical Systems, *InSite* and *Firefly* Fluorescence imaging systems (“*Firefly*”), instruments and accessories (e.g., *EndoWrist*, *EndoWrist* Vessel Sealer, *da Vinci Single-Site* and *EndoWrist* Stapler), and training technologies. We have commercialized the following *da Vinci* Surgical Systems: the *da Vinci* standard Surgical System, commercialized in 1999, the *da Vinci S* Surgical System, commercialized in 2006, the *da Vinci Si* Surgical System, commercialized in 2009, the *da Vinci Xi* Surgical System, commercialized in the second quarter of 2014, and the *da Vinci X* Surgical System, commercialized in the second quarter of 2017. These systems include a surgeon’s console (or consoles), imaging electronics, a patient-side cart, and computational hardware and software.

We offer over 65 different multiport *da Vinci* instruments enabling surgeons’ flexibility in choosing the types of tools needed in a particular surgery. These multiport instruments are generally robotically controlled versions of surgical tools that surgeons would use in either open or laparoscopic surgery. We offer advanced instrumentation for the *da Vinci Si*, *da Vinci Xi*, and *da Vinci X* platforms, including the *EndoWrist* Vessel Sealer and *EndoWrist* Stapler products to provide surgeons with sophisticated, computer-aided tools to precisely and efficiently interact with tissue. Instruments for the *da Vinci X* Surgical System are the same as *da Vinci Xi* Surgical System.

We offer *Single-Site* instruments for use with the *da Vinci Si*, *da Vinci Xi*, and *da Vinci X* Surgical Systems. *Single-Site* instruments are most commonly used in cholecystectomy and hysterectomy procedures. *Single-Site* instruments enable surgeons to also perform surgery through a single port via the patient’s belly button, resulting in the potential for virtually scarless results.

Training technologies include our *da Vinci* Skills Simulator, *da Vinci* Connect remote case observation and mentoring tool, and our dual console for use in surgeon proctoring and collaborative surgery.

Business Model

Overview

We generate revenue from both the initial capital sales of *da Vinci* Surgical Systems and from subsequent sales of instruments, accessories and service, as recurring revenue. The *da Vinci* Surgical System generally sells for approximately between \$0.5 million and \$2.5 million, depending upon the model, configuration and geography, and represents a significant capital equipment investment for our customers. We generate recurring revenue as our customers purchase our *EndoWrist* and *Single-Site* instrument and accessory products used in performing procedures with the *da Vinci* Surgical System. Our instruments and accessories have a limited life and will either expire or wear out as they are used in surgery, at which point they need to be replaced. We typically enter into service contracts at the time systems are sold at an annual rate of approximately \$80,000 to \$170,000, depending upon the configuration of the underlying system and composition of the services offered under the contract. These service contracts have generally been renewed at the end of the initial contractual service periods.

Recurring Revenue

Recurring revenue has generally grown at a faster rate than system revenue in the last few fiscal years. Recurring revenue increased to \$1.9 billion, or 71% of total revenue in 2016, compared with \$1.7 billion, or 70% of total revenue in 2015, and \$1.5 billion, or 70% of total revenue in 2014. Recurring revenue for the nine months ended September 30, 2017, was \$1.6 billion, or 72% of total revenue, compared with \$1.4 billion, or 71% of total revenue for the nine months ended September 30, 2016. The growth of recurring revenue and its increasing proportion of total revenue largely reflect continued procedure adoption and increased system utilization on a growing base of installed *da Vinci* Surgical Systems. The installed base of *da Vinci* Surgical Systems has grown to approximately 4,271 at September 30, 2017.

Procedure Mix / Products

Our procedure business is primarily comprised of: (1) cancer and other highly complex procedures and (2) less complex procedures for benign conditions. Cancer and other highly complex procedures tend to be reimbursed at higher rates than less complex procedures for benign conditions. Thus, hospitals are more sensitive to the costs associated with treating less complex benign conditions. Our strategy is to provide hospitals with attractive clinical and economic solutions in each of these procedure categories. Our fully featured *da Vinci Xi* system with advanced instruments, including the *EndoWrist* Vessel Sealer, *EndoWrist* Stapler products, and our Table Motion product, target the more complex procedure segment. Lower priced products, including the three-arm *da Vinci Si-e* System, refurbished *da Vinci Si* System, and *Single-Site* instruments, are targeted towards less complex procedures. Our *da Vinci X* System is priced between the *da Vinci Si* and *Xi* Systems and offers customers access to many of the *da Vinci Xi* features, including *da Vinci Xi* advanced instrumentation and imaging systems, at a more accessible price point.

Procedure Seasonality

More than half of *da Vinci* procedures performed are for benign conditions, most notably benign hysterectomies, hernia repairs, and cholecystectomies. The proportion of these procedures for benign conditions has grown over time in relation to the total number of procedures performed. Hysterectomies for benign conditions, hernia repairs, cholecystectomies, and other short-term elective procedures tend to be more seasonal than cancer operations and surgeries for other life threatening conditions. Seasonality

in the U.S. for these procedures for benign conditions typically results in higher fourth quarter procedure volume when more patients have met annual deductibles and lower first quarter procedure volume when deductibles are reset. Seasonality outside the U.S. varies and is more pronounced around local holidays and vacation periods.

Distribution Channels

We provide our products through direct sales organizations in the U.S., Japan, South Korea, and Europe, excluding Spain, Portugal, Italy, Greece, and Eastern European countries. In the remainder of our OUS markets, we provide our products through distributors.

Intuitive Surgical da Vinci System Leasing

Since 2013, we have entered into sales-type and operating lease arrangements directly with certain qualified customers as a way to offer customers flexibility in how they acquire *da Vinci* systems and expand *da Vinci* surgery availability while leveraging our balance sheet. The leases generally have commercially competitive terms as compared with other third party entities that offer equipment leasing. We include both operating and sales-type leases in our system shipment and installed base disclosures. We exclude operating leases from our system average selling prices computations.

We shipped 26 and 86 systems under lease arrangements, of which 20 and 68 were classified as operating leases, in the three and nine months ended September 30, 2017, respectively, compared with 19 and 71 systems under lease arrangements, of which 15 and 49 were classified as operating leases, in the three and nine months ended September 30, 2016, respectively. Generally, the operating lease arrangements provide our customers with the right to purchase the leased system sometime during and/or at the end of the lease term. Revenue generated from customer purchases of systems under operating lease arrangements ("Lease Buyouts") was \$10.8 million and \$26.0 million for the three and nine months ended September 30, 2017, respectively, compared with \$13.1 million and \$31.1 million for the three and nine months ended September 30, 2016, respectively. We expect that revenue recognized from customer exercises of the buyout options will fluctuate based on the timing of when, and if, customers choose to exercise their buyout options. Operating lease revenue was \$6.7 million and \$18.1 million for the three and nine months ended September 30, 2017, respectively, compared with \$4.2 million and \$12.0 million for the three and nine months ended September 30, 2016, respectively. As of September 30, 2017, 134 *da Vinci* systems were installed at customers under operating lease arrangements. We believe our leasing program has been effective and well-received, and we are willing to expand it based on customer demand.

Regulatory Activities

Clearances and Approvals

We have obtained the clearances required to market our multiport products associated with all of our *da Vinci* Surgical Systems (Standard, *S*, *Si*, *Xi*, and *X* systems) for our targeted surgical specialties within the U.S., South Korea, and the European markets in which we operate.

In April 2017, we received CE mark clearance for our *da Vinci X* Surgical System in Europe. Following the CE mark, in May 2017, we received U.S. Food and Drug Administration ("FDA") clearance to market our *da Vinci X* Surgical System in the U.S. We received regulatory clearance for the *da Vinci X* Surgical System in South Korea in September 2017 (see the description of the *da Vinci X* Surgical System in the New Product Introductions section below). Regulatory clearances for *da Vinci X* Surgical System may be received in other markets over time.

In March 2014, we received FDA clearance to market our *da Vinci Xi* Surgical System in the U.S. In June 2014, we received CE mark clearance for our *da Vinci Xi* Surgical System in Europe. We received regulatory clearances for the *da Vinci Xi* Surgical System in South Korea in October 2014 and in Japan in March 2015. The regulatory status of the *da Vinci Xi* Surgical System in other OUS markets varies by country.

In January 2016, we received FDA clearance for our Integrated Table Motion product. In March 2016, we received FDA 510(k) clearances in the U.S. and CE mark clearances in Europe for *Single-Site* instruments and the 30mm *EndoWrist* stapler products for the *da Vinci Xi* Surgical System (see the description of the *EndoWrist* Stapler 30 in the New Product Introductions section below).

In April 2014, we received FDA clearance to market our *da Vinci Single Port* Surgical System in the U.S. for single-port urologic surgeries. At the time, we decided not to market that version of the *da Vinci Single Port* Surgical System. We instead elected to pursue the necessary modifications to integrate it into the *da Vinci Xi/X* product family as a dedicated single port patient console compatible with the existing *da Vinci Xi/X* surgeon console, vision cart, and other equipment. We have since completed these modifications and have begun clinical evaluations of the product. We plan to seek FDA clearance(s) for this *da Vinci Xi/X* version of the *da Vinci Single Port* Surgical System for procedure(s) in which a single small entry point to the body and parallel delivery of instruments is important. Such surgeries could include those performed through a natural orifice like the mouth for head and neck procedures or those performed through a single skin incision. It is unlikely that the *da Vinci Single Port* Surgical System will contribute any revenue in 2017.

We obtained approval from the Japanese Ministry of Health, Labor, and Welfare (“MHLW”) for our *da Vinci Xi* Surgical System in March 2015. National reimbursement status was received for *da Vinci* Prostatectomy (“dVP”) procedures in Japan effective April 2012 and for *da Vinci* partial nephrectomy procedures in April 2016. With our support, Japanese university hospitals and surgical societies are seeking reimbursement for additional procedures through the MHLW’s Senshin Iryo (Advanced Medical Care) processes as well as alternative reimbursement processes. There are multiple pathways to obtain reimbursement for procedures including those that require in-country clinical data/economic data. Reimbursements are considered in April of even numbered years. There can be no assurance that we will gain additional reimbursements for the procedures or at the times we have targeted. If we are not successful in obtaining additional regulatory clearances, and adequate procedure reimbursements for future products and procedures, then the demand for our products in Japan could be limited.

Recalls and Corrections

Medical device companies have regulatory obligations to correct or remove medical devices in the field that could pose a risk to health. The definition of “recalls and corrections” is expansive and includes repair, replacement, inspections, relabeling, and issuance of new or additional instructions for use or reinforcement of existing instructions for use and training when such actions are taken for specific reasons of safety or compliance. These field actions require stringent documentation, reporting, and monitoring worldwide. There are other actions which a medical device manufacturer may take in the field without reporting, including but not limited to routine servicing and stock rotations.

As we determine whether a field action is reportable in any regulatory jurisdiction, we prepare and submit notifications to the appropriate regulatory agency for the particular jurisdiction. Regulators can require the expansion, reclassification, or change in scope and language of the field action. In general, upon submitting required notifications to regulators regarding a field action which is a recall or correction, we will notify customers regarding the field action, provide any additional documentation required in their national language, and arrange, as required, return or replacement of the affected product or a field service visit to perform the correction.

Field actions as well as certain outcomes from regulatory activities can result in adverse effects on our business, including damage to our reputation, delays by customers of purchase decisions, reduction or stoppage of the use of installed systems, and reduced revenue as well as increased expenses.

Procedures

We model patient value as equal to *procedure efficacy / invasiveness*. In this equation *procedure efficacy* is defined as a measure of the success of the surgery in resolving the underlying disease and *invasiveness* is defined as a measure of patient pain and disruption of regular activities. When the patient value of a *da Vinci* procedure is greater than that of alternative treatment options, patients may benefit from seeking out surgeons and hospitals that offer *da Vinci* Surgery, which could potentially result in a local market share shift. *da Vinci* procedure adoption occurs procedure by procedure, market by market, and is driven by the relative patient value and total treatment costs of *da Vinci* procedures as compared to alternative treatment options for the same disease state or condition.

Worldwide Procedures

da Vinci systems and instruments are regulated independently in various countries and regions of the world. The discussion of indications for use and representative or target procedures is intended solely to provide an understanding of the market for *da Vinci* products and is not intended to promote for sale or use any Intuitive Surgical product outside of its licensed or cleared labeling and indications for use.

The adoption of *da Vinci* Surgery has the potential to grow for those procedures that offer greater patient value than non-*da Vinci* alternatives, within the prevailing economics of healthcare providers. *da Vinci* Surgical Systems are used primarily in gynecologic surgery, general surgery, urologic surgery, cardiothoracic surgery, and head and neck surgery. We focus our organization and investments on developing, marketing, and training for those products and targeted procedures where *da Vinci* can bring patient value relative to alternative treatment options and/or economic benefit to healthcare providers. Target procedures in gynecology include *da Vinci* Hysterectomy (“dVH”), for both cancer and benign conditions, and sacrocolpopexy. Target procedures in general surgery include hernia repair (both ventral and inguinal), colorectal procedures, and cholecystectomy. Target procedures in urology include dVP and partial nephrectomy. In cardiothoracic surgery, target procedures include *da Vinci* Lobectomy and *da Vinci* Mitral Valve Repair. In head and neck surgery, target procedures include certain procedures resecting benign and malignant tumors classified as T1 and T2. Not all the indications, procedures, or products described may be available in a given country or region or on all generations of *da Vinci* Surgical Systems. Patients need to consult the product labeling in their specific country and for each product in order to determine the actual authorized uses, as well as important limitations, restrictions, or contraindications.

In 2016, approximately 753,000 surgical procedures were performed with the *da Vinci* Surgical Systems, compared with approximately 652,000 and 570,000 procedures performed in 2015 and 2014, respectively. The growth in our overall procedure volume in 2016 was driven by growth in U.S. general surgery procedures and worldwide urologic procedures.

U.S. Procedures

Overall U.S. procedure volume grew to approximately 563,000 in 2016, compared with approximately 499,000 in 2015 and approximately 449,000 in 2014. Gynecology is our largest U.S. surgical specialty and the procedure volume was approximately 246,000 in 2016, compared with 238,000 in 2015 and 235,000 in 2014. General surgery is our second largest and fastest growing specialty in the U.S. with procedure volume that grew to approximately 186,000 in 2016, compared with approximately 140,000 in 2015 and 107,000 in 2014. U.S. urology procedure volume was approximately 109,000 in 2016, compared with approximately 102,000 in 2015 and 91,000 in 2014.

Procedures Outside of the U.S.

Overall OUS procedures grew to approximately 190,000 in 2016, compared with approximately 153,000 in 2015 and approximately 121,000 in 2014. Procedure growth in most OUS markets was driven largely by urology procedure volume. OUS dVP procedure volume grew to approximately 92,000 in 2016, compared with approximately 79,000 in 2015 and approximately 65,000 in 2014. Partial nephrectomy, general surgery, and gynecologic oncology procedures also contributed to OUS procedure growth.

Recent Business Events and Trends

Procedures

Overall. Total *da Vinci* procedures grew approximately 16% for both the nine months ended September 30, 2017, and September 30, 2016. U.S. procedure growth was approximately 13% for both the nine months ended September 30, 2017, and September 30, 2016. Year-to-date 2017 U.S. procedure growth was largely attributable to growth in general surgery procedures, most notably hernia repair and colorectal procedures, and thoracic procedures, as well as continued moderate growth in more mature gynecologic and urologic procedure categories.

Procedure volume OUS grew approximately 24% for both the nine months ended September 30, 2017, and September 30, 2016. Year-to-date 2017 OUS procedure growth was driven by continued growth in dVP procedures and earlier stage growth in kidney cancer procedures, general surgery, and gynecology. We believe growth in these global markets is being driven by increased acceptance among surgeons and health systems, supported by expanded global evidence validating the clinical and economic value of *da Vinci* procedures.

U.S. Gynecology. Growth in gynecology procedures during the nine months ended September 30, 2017, continued at a rate consistent with 2016. We believe that overall U.S. gynecologic surgery volume for benign conditions (robotic and other modalities) has been pressured in recent years by factors including, but not limited to, a trend by payers toward encouraging conservative disease management, trends towards higher patient deductibles and co-pays, and FDA actions regarding the use of power morcellation in uterine surgeries. Combining robotic, laparoscopic, and vaginal approaches, MIS represents about 80% of the U.S. hysterectomy market for benign conditions, and thus the rate of migration from open surgeries to MIS has slowed. We believe that our growth in gynecologic procedures over the past several years is primarily being driven by consolidation of surgical volumes into surgeons that focus on cancer and complex surgeries, as well as higher sacrocolpopexy procedure volume.

U.S. General Surgery. Growth in general surgery procedures during the nine months ended September 30, 2017, continued at a rate consistent with 2016. The year-to-date 2017 growth in U.S. general surgery procedures was primarily driven by ventral and inguinal hernia procedures, as it did in 2015 and 2016. We believe that growth in *da Vinci* hernia repair reflects improved clinical outcomes within certain patient populations, as well as potential cost benefits relative to certain alternative treatments. We believe hernia repair procedures represent a significant opportunity with the potential to drive growth in future periods. However, given the differences in complexity among hernia patient populations and varying surgeon opinion regarding optimal surgical technique, it is difficult to estimate the timing of and to what extent *da Vinci* hernia repair procedure volume will grow in the future. We expect a large portion of hernia repairs will continue to be performed via different modalities of surgery.

Adoption of *da Vinci* for colorectal procedures, which includes several underlying procedures including low anterior resections for rectal cancers and certain colon procedures for benign and cancerous conditions, has been ongoing for several years, and is supported by our recently launched technologies such as the *da Vinci Xi* Surgical System, *EndoWrist* Stapler, *EndoWrist* Vessel Sealer, and Integrated Table Motion.

Global Urology. Along with U.S. general surgery, global urology procedures contributed to the majority of our recent procedure growth. Year-to-date 2017 growth in U.S. dVP procedures continued at a rate consistent with 2016. We believe the return to growth in U.S. dVP in 2014 and 2015 reflected surgical procedures being performed for men who previously may have deferred screening or definitive treatment based on the U.S. Preventive Services Task Force recommendation against PSA screening and changes in treatment patterns for low risk prostate cancer. dVP growth slowed in 2016, reflecting surgical volumes coming into closer alignment with new diagnoses of prostate cancer. As the U.S. standard of care for the surgical treatment of prostate cancer, we expect that the number of dVP procedures performed in the U.S. will largely fluctuate with the overall prostatectomy market. dVP is the largest overall OUS procedure. Year-to-date 2017 growth in OUS dVP was strong and OUS dVP is at various stages of adoption in different areas of the world.

Kidney cancer procedures have also been a strong contributor to our recent global urology procedure growth. Clinical publications have demonstrated that the presence of a *da Vinci* system in a hospital or market increases the likelihood that a patient will receive nephron sparing surgery through a partial nephrectomy, which is typically surgical society guideline-recommended therapy.

OUS Procedures. The year-to-date 2017 OUS procedure growth rate reflects continued *da Vinci* adoption in European and Asian markets. Growth was strong in Asia and varied by country in Europe. We experienced strong procedure growth in China as systems sold under a previous public hospital quota system have been installed and as utilization of those systems have increased. However, procedure growth is moderating in China. Future system placements and our ability to sustain procedure growth in China are dependent on obtaining additional importation authorizations or public hospital quotas, as well as on hospitals completing a central purchasing tender process under such authorizations. The most recent authorization expired at the end of 2015. The timing and magnitude of future authorizations that may enable future system placements is not certain. We have experienced strong procedure growth in Japan since receiving the national reimbursements, outlined above, for dVP and partial nephrectomy. However, as adoption for these procedures has progressed, procedure growth in Japan is slowing. Future procedure growth in Japan will likely be paced by the timing of procedure reimbursement approvals for procedures in addition to dVP and partial nephrectomy.

System Demand

Future demand for *da Vinci* Surgical Systems will be impacted by factors including hospital response to the evolving health care environment under the current U.S. administration, procedure growth rates, hospital consolidation trends, evolving system utilization and point of care dynamics, capital replacement trends, additional reimbursements in various global markets, including Japan, the timing around governmental tenders and authorizations, including China, and the timing of when we receive regulatory clearance in our other OUS markets for our *Xi* System, *X* System, and related instruments. Market acceptance of our recently launched *X* System may also impact future systems placement. Demand may also be impacted by robotic surgery competition, including from companies that have introduced products in the field of robotic surgery or have made explicit statements about their efforts to enter the field, including but not limited to: Auris Surgical Robotics, Inc.; Avatera Medical GmbH; Cambridge Medical Robotics Ltd.; Johnson & Johnson and Google Inc. and their joint venture, Verb Surgical Inc.; Medcaroid Inc.; MedRobotics Corp.; meerecompany Inc.; Medtronic PLC.; Olympus Corp.; Samsung Corporation; Smart Robot Technology Group Co. Ltd.; Titan Medical, Inc.; and TransEnterix, Inc., as well as other economic and geopolitical factors.

New Product Introductions

***da Vinci X* Surgical System.** In May 2017, we launched a new *da Vinci* model, the *da Vinci X*, in the U.S. The *da Vinci X* system provides surgeons and hospitals with access to some of the most advanced robotic-assisted surgery technology at a lower cost. The *da Vinci X* uses the same vision cart and surgeon console that are found on our flagship product, the *da Vinci Xi* system, giving our customers the option of adding advanced capabilities, and providing a pathway for upgrading should they choose to do so as their practice and needs grow.

The *da Vinci X* enables optimized, focused-quadrant surgery including procedures like prostatectomy, partial nephrectomy, benign hysterectomy, and sacrocolpopexy, among others. The system features flexible port placement and 3-D digital optics, while incorporating the same advanced instruments and accessories as the *da Vinci Xi*. The new system drives operational efficiencies through set-up technology that uses voice and laser guidance, drape design that simplifies surgery preparations, and a lightweight, fully integrated endoscope.

***da Vinci Xi* Integrated Table Motion.** In January 2016, we launched Integrated Table Motion in the U.S. Integrated Table Motion coordinates the movements of the *da Vinci* robot arms with an advanced operating room table, the TruSystem® 7000dV sold by Trumpf Medical™, to enable shifting a patient's position in real-time while the *da Vinci* surgical robotic arms remain docked. This gives operating room teams the capabilities to optimally position the operating table so that gravity exposes anatomy during multi-quadrant *da Vinci* System procedures, maximize reach and access to target anatomy enabling surgeons to interact with tissue at an ideal working angle, and reposition the table during the procedure to enhance anesthesiologists' care of the patient.

EndoWrist Stapler 30. In March 2016, we received FDA clearance in the U.S. for the *EndoWrist* Stapler 30 instrument with Blue, Green, White, and Gray 30mm reloads for use with the *da Vinci Xi* Surgical System. It is intended to deliver particular utility

with fine tissue interaction in lobectomy and other thoracic procedures. The *EndoWrist* Stapler 30 is a wristed, stapling instrument intended for resection, transection, and/or creation of anastomoses.

EndoWrist Stapler 30 broadens our existing stapler product line which includes *EndoWrist* Stapler 45 Blue, Green, and White reloads. Not all reloads or staplers are available for use on all systems or in all countries.

Intuitive Surgical-Fosun Medical Technology (Shanghai) Co., Ltd.

In September 2016, we agreed to establish a joint venture with Shanghai Fosun Pharmaceutical (Group) Co., Ltd. (“Fosun Pharma”), a subsidiary of Fosun International Limited, to research, develop, manufacture, and sell robotic-assisted catheter-based medical devices. The joint venture will initially produce products targeting early diagnosis and cost-effective treatment of lung cancer, one of the most commonly diagnosed forms of cancer in the world. The technology will be used in robotic-assisted medical devices based on catheters and incorporates proprietary intellectual property developed or owned by us. The joint venture is located in Shanghai, China, where it will perform research and development activities and manufacture catheter-based products for global distribution. Distribution in China will be conducted by the joint venture. Distribution outside of China will be conducted by us. The joint venture is owned 60% by us and 40% by Fosun Pharma. The companies will contribute up to \$100 million as required by the joint venture, an arrangement representing a significant expansion of our relationship with Fosun Pharma. Since 2011, Chindex Medical Limited, a subsidiary of Fosun Pharma, has been our distribution partner for *da Vinci* Surgical Systems in China.

In the second quarter of 2017, the joint venture company was legally formed after receiving required approvals from the relevant PRC government authorities and administrative agencies. During the third quarter of 2017, the joint venture received contributions from us and Fosun Pharma. The joint venture also commenced hiring employees and began planning for the establishment of manufacturing infrastructure. We expect that the joint venture will incur net losses before product commercialization and that it will not generate revenue in 2018. However, there can be no assurance that we and the joint venture can successfully complete the development of the robotic-assisted catheter-based medical devices; that we and the joint venture will successfully commercialize such products; that the joint venture will not require additional contributions to fund its business; or that the joint venture will become profitable.

Third Quarter 2017 Financial Highlights

- Total revenue increased by 18% to \$806.1 million during the three months ended September 30, 2017, compared with \$682.9 million during the three months ended September 30, 2016. Third quarter 2017 total revenue included \$21.3 million revenue recognized related to the customer trade-out program as described below.
- Approximately 214,000 *da Vinci* procedures were performed during the three months ended September 30, 2017, an increase of approximately 15% compared with approximately 186,000 for the three months ended September 30, 2016.
- Instrument and accessory revenue increased by 15% to \$401.2 million during the three months ended September 30, 2017, compared with \$348.1 million during the three months ended September 30, 2016.
- Recurring revenue increased by 15% to \$548.0 million during the three months ended September 30, 2017, representing 68% of total revenue, compared with \$477.8 million during the three months ended September 30, 2016, representing 70% of total revenue.
- Systems revenue increased by 26% to \$258.1 million during the three months ended September 30, 2017, compared with \$205.1 million during the three months ended September 30, 2016. Third quarter 2017 systems revenue included revenue recognized related to the customer trade-out program as described below.
- A total of 169 *da Vinci* Surgical Systems were shipped during the three months ended September 30, 2017, compared with 134 during the three months ended September 30, 2016. As of September 30, 2017, we had a *da Vinci* Surgical System installed base of approximately 4,271 systems, an increase of approximately 12% compared with the installed base as of September 30, 2016.
- Gross profit as a percentage of revenue was 70.3% for the three months ended September 30, 2017, compared with 71.3% for the three months ended September 30, 2016. Gross profit for the three months ended September 30, 2016, benefited from a \$7.1 million Medical Device Excise Tax (“MDET”) refund.
- Operating income increased by 9% to \$278.6 million during the three months ended September 30, 2017, compared with \$256.4 million during the three months ended September 30, 2016. Operating income included \$55.9 million and \$46.9 million of share-based compensation expense related to employee stock plans during the three months ended September 30, 2017, and 2016, respectively. Operating income for the three months ended September 30, 2017, included \$9.7 million of net pre-tax litigation related charges.
- As of September 30, 2017, we had \$3.8 billion in cash, cash equivalents, and investments. Cash, cash equivalents, and investments increased by \$378.7 million, compared with June 30, 2017, primarily as a result of cash generated from operating activities.

Trade-Out Program: During the first quarter 2017, we deferred \$23.4 million and \$8.1 million of revenue and product costs, respectively, relating to a customer trade-out program that was offered to certain customers. Under this trade-out program, those customers were given the option to return systems purchased in the first quarter of 2017 and receive a credit towards the purchase of *da Vinci X* surgical system that was launched in the second quarter of 2017. Subject to meeting all other criteria of our revenue recognition policy, the amounts deferred are recognized at the date the new products are accepted by the customers participating in the trade-out program, or at the expiration of unexercised rights. During the three months ended September 30, 2017, we recognized \$21.3 million and \$7.3 million of previously deferred revenue and product costs, respectively, as a result of those offers having expired unexercised. As of September 30, 2017, a total of \$2.1 million and \$0.8 million of revenue and product costs, respectively, remained deferred. We anticipate this program to be substantially complete prior to the end of 2017.

Results of Operations

The following table sets forth, for the periods indicated, certain unaudited Condensed Consolidated Statements of Income information (in millions, except percentages):

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2017	% of total revenue	2016	% of total revenue	2017	% of total revenue	2016	% of total revenue
Revenue:								
Product	\$ 659.3	82 %	\$ 553.2	81%	\$ 1,807.5	81%	\$ 1,565.2	80%
Service	146.8	18 %	129.7	19%	429.0	19%	382.3	20%
Total revenue	806.1	100 %	682.9	100%	2,236.5	100%	1,947.5	100%
Cost of revenue:								
Product	195.0	24 %	158.4	23%	543.1	24%	475.8	24%
Service	44.3	6 %	37.5	6%	132.6	6%	108.8	6%
Total cost of revenue	239.3	30 %	195.9	29%	675.7	30%	584.6	30%
Product gross profit	464.3	58 %	394.8	58%	1,264.4	57%	1,089.4	56%
Service gross profit	102.5	12 %	92.2	13%	296.4	13%	273.5	14%
Gross profit	566.8	70 %	487.0	71%	1,560.8	70%	1,362.9	70%
Operating expenses:								
Selling, general and administrative	204.8	25 %	168.0	25%	591.7	26%	511.6	26%
Research and development	83.4	10 %	62.6	9%	241.5	11%	170.5	9%
Total operating expenses	288.2	35 %	230.6	34%	833.2	37%	682.1	35%
Income from operations	278.6	35 %	256.4	37%	727.6	33%	680.8	35%
Interest and other income, net	10.8	1 %	10.4	2%	29.6	1%	23.9	1%
Income before taxes	289.4	36 %	266.8	39%	757.2	34%	704.7	36%
Income tax (benefit) expense	(8.1)	(1)%	55.8	8%	58.4	3%	172.8	9%
Net income	\$ 297.5	37 %	\$ 211.0	31%	\$ 698.8	31%	\$ 531.9	27%

Total Revenue

Total revenue was \$806.1 million for the three months ended September 30, 2017, compared with \$682.9 million for the three months ended September 30, 2016, resulting from 15% higher recurring revenue driven by approximately 15% higher procedure volume and 26% higher systems revenue.

Revenue denominated in foreign currencies as a percentage of total revenue was approximately 18% and 17% for the three and nine months ended September 30, 2017, respectively, compared with 19% for both the three and nine months ended September 30, 2016. We sell our products and services in Euros and British Pounds in those European markets where we have direct distribution channels, and in Japanese Yen and Korean Won in Japan and South Korea, respectively. Foreign currency exchange rates did not have a material impact on revenue or operating income.

Revenue generated in the U.S. accounted for 74% and 73% of total revenue for the three and nine months ended September 30, 2017, respectively, compared with 72% of total revenue for both the three and nine months ended September 30, 2016. We believe that U.S. revenue has accounted for the large majority of total revenue due to patients' ability to choose their provider and method of treatment in the U.S., reimbursement structures supportive of innovation and minimally invasive surgery, and initial investments focused on U.S. infrastructure. We have been investing in our business in the OUS market and our OUS procedures have grown faster in proportion to U.S. procedures. We expect that our OUS procedures and revenue will make up a greater portion of our business in the long term.

The following table summarizes our revenue and *da Vinci* Surgical System unit shipments for the three and nine months ended September 30, 2017, and 2016 (in millions, except percentages and unit shipments):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2017	2016	2017	2016
Revenue				
Instrument and accessory	\$ 401.2	\$ 348.1	\$ 1,179.8	\$ 1,009.5
Systems	258.1	205.1	627.7	555.7
Total product revenue	659.3	553.2	1,807.5	1,565.2
Service	146.8	129.7	429.0	382.3
Total revenue	\$ 806.1	\$ 682.9	\$ 2,236.5	\$ 1,947.5
Recurring revenue	\$ 548.0	\$ 477.8	\$ 1,608.8	\$ 1,391.8
% of total revenue	68%	70%	72%	71%
United States	\$ 593.5	\$ 494.1	\$ 1,635.7	\$ 1,409.6
OUS	212.6	188.8	600.8	537.9
Total revenue	\$ 806.1	\$ 682.9	\$ 2,236.5	\$ 1,947.5
% of Revenue - U.S.	74%	72%	73%	72%
% of Revenue - OUS	26%	28%	27%	28%

Unit Shipments by Region:

U.S. unit shipments	107	85	287	238
OUS unit shipments	62	49	181	136
Total unit shipments*	169	134	468	374
*Systems shipped under operating leases (included in total unit shipments)	20	15	68	49

Unit Shipments involving System Trade-ins:

Unit shipments involving trade-ins	44	33	106	113
Unit shipments not involving trade-ins	125	101	362	261

Product Revenue

Three months ended September 30, 2017:

Product revenue increased by 19% to \$659.3 million for the three months ended September 30, 2017, compared with \$553.2 million for the three months ended September 30, 2016.

Instrument and accessory revenue increased by 15% to \$401.2 million for the three months ended September 30, 2017, compared with \$348.1 million for the three months ended September 30, 2016. The increase in instrument and accessory revenue was driven by procedure growth of approximately 15%. Third quarter 2017 U.S. procedure growth of approximately 12% was driven by growth in general surgery procedures, most notably hernia repair and colorectal procedures, and thoracic procedures, as well as moderate growth in more mature urologic procedures. OUS procedure growth was approximately 23% for the third quarter of 2017, driven by continued growth in dVP procedures and earlier stage growth in kidney cancer procedures, general surgery and gynecology. Geographically, third quarter OUS procedure growth was driven by procedure expansion in Japan, South Korea, and China. Procedure growth varied by country in our European market.

Systems revenue increased by 26% to \$258.1 million for the three months ended September 30, 2017, compared with \$205.1 million for the three months ended September 30, 2016. Higher third quarter 2017 systems revenue was driven by higher system shipments and revenue recognized related to the *da Vinci X* trade-out program, largely offset by lower systems average selling price (“ASP”), a higher number of system placements under operating lease arrangements, and lower Lease Buyout revenue. Revenue from Lease Buyouts was \$10.8 million for three months ended September 30, 2017, compared with \$13.1 million for the three months ended September 30, 2016. We expect revenue from Lease Buyouts to fluctuate period to period based on the timing of when, and if, customers choose to exercise the buyout options embedded in their leases.

During the third quarter of 2017, a total of 169 systems were shipped compared with 134 during the third quarter of 2016. By geography, 107 systems were shipped into the U.S., 25 into Europe, 26 into Asia, and 11 into other markets during the third quarter of 2017, compared with 85 systems shipped into the U.S., 18 into Europe, 25 into Asia, and 6 into other markets during the third quarter of 2016. During the third quarter of 2017, 20 of the 169 systems were shipped under operating lease arrangements compared with 15 of 134 systems shipped during the third quarter of 2016. Operating lease revenue was \$6.7 million for the three months ended September 30, 2017, compared with \$4.2 million for the three months ended September 30, 2016. The increase in systems shipments was primarily driven by procedure growth and the need for hospitals to expand or establish capacity. System placements are expected to continue to vary as some of our OUS markets are in early stages of adoption, some markets are highly seasonal reflecting budget cycles or vacation patterns, and sales into some markets are constrained by government regulations.

The *da Vinci* Surgical System ASP, excluding the impact of systems shipped under operating leases, was approximately \$1.47 million for both the three and nine months ended September 30, 2017, compared with \$1.53 million for both the three and nine months ended September 30, 2016. The lower third quarter 2017 ASP primarily reflect product and geographic mix as well as lower pricing offered to customers purchasing multiple systems. ASPs fluctuate period to period based on geographic and product mix, product pricing, systems shipped involving trade-ins, and changes in foreign exchange rates.

Nine months ended September 30, 2017:

Product revenue increased by 15% to \$1.8 billion for the nine months ended September 30, 2017, compared with \$1.6 billion for the nine months ended September 30, 2016.

Instrument and accessory revenue increased by 17% to \$1.2 billion for the nine months ended September 30, 2017, compared with \$1.0 billion for the nine months ended September 30, 2016. The increase in instrument and accessory revenue was driven by procedure growth of approximately 16% and higher sales of our advanced instruments. U.S. procedure growth of approximately 13% for the nine months ended September 30, 2017, was driven by growth in general surgery procedures, most notably hernia repair and colorectal procedures, and thoracic procedures, as well as moderate growth in more mature gynecologic and urologic procedure categories. OUS procedure growth was approximately 24% for the nine months ended September 30, 2017, driven by continued growth in dVP procedures and earlier stage growth in kidney cancer procedures, general surgery and gynecology. Geographically, higher OUS procedure growth for the nine months ended September 30, 2017, was driven by strong procedure expansion in Japan, South Korea, and China. Procedure growth varied by country in our European market.

Systems revenue increased by 13% to \$627.7 million for the nine months ended September 30, 2017, compared with \$555.7 million for the nine months ended September 30, 2016. Higher systems revenue for the nine months ended September 30, 2017, was driven primarily by higher system shipments and largely offset by a higher number of system placements under operating lease arrangements and lower systems ASP.

During the nine months ended September 30, 2017, a total of 468 systems were shipped compared with 374 during the nine months ended September 30, 2016. By geography, 287 systems were shipped into the U.S., 75 into Europe, 74 into Asia, and 32 into other markets during the nine months ended September 30, 2017, compared with 238 systems shipped into the U.S., 53 into Europe, 66 into Asia, and 17 into other markets during the nine months ended September 30, 2016. During the nine months ended September 30, 2017, 68 of the 468 systems were shipped under operating lease arrangements compared with 49 of 374 systems shipped during the nine months ended September 30, 2016. Operating lease revenue was \$18.1 million for the nine months ended September 30, 2017, compared with \$12.0 million for the nine months ended September 30, 2016. The increase in systems shipments was primarily driven by procedure growth and the need for hospitals to expand or establish capacity.

Service Revenue

Service revenue increased by 13% to \$146.8 million for the three months ended September 30, 2017, compared with \$129.7 million for the three months ended September 30, 2016. Service revenue increased by 12% to \$429.0 million for the nine months ended September 30, 2017, compared with \$382.3 million for the nine months ended September 30, 2016. Higher service revenue for the three and nine months ended September 30, 2017, was primarily driven by a larger installed base of *da Vinci* Surgical Systems producing service revenue.

Gross Profit

Product gross profit for the three months ended September 30, 2017, increased 18% to \$464.3 million, representing 70.4% of product revenue, compared with \$394.8 million, representing 71.4% of product revenue, for the three months ended September 30, 2016. Product gross profit for the nine months ended September 30, 2017, increased 16% to \$1.3 billion, representing 70.0% of product revenue, compared with \$1.1 billion, representing 69.6% of product revenue, for the nine months ended September 30, 2016. The higher product gross profit for the three and nine months ended September 30, 2017, was primarily driven by higher product revenue.

The lower product gross profit margin for the three months ended September 30, 2017, as compared with the same period in 2016, was primarily driven by a \$7.1 million MDET refund recorded as a reduction to cost of revenue during the three months ended September 30, 2016. The higher product gross profit margin for the nine months ended September 30, 2017, was due to manufacturing efficiencies and product cost reductions on some of our newer products, partially offset by a \$7.8 million litigation settlement charge related to a license and supply agreement recognized in cost of revenue during the first quarter of 2017 and the MDET refund described above. The trade-out program described above did not have a material impact on product gross profit margin.

MDET became effective on January 1, 2013. In December 2015, the Consolidated Appropriations Act, 2016 (the "Appropriations Act") was signed into law. The Appropriations Act includes a two-year moratorium on MDET such that medical device sales in 2016 and 2017 are exempt from the excise tax. MDET is scheduled to be reinstated on January 1, 2018. Product gross profit included \$17.0 million of MDET expense, representing approximately 0.9% of total product revenue, for the year ended December 31, 2015.

Product gross profit for the three and nine months ended September 30, 2017, reflected share-based compensation expense of \$7.0 million and \$20.5 million, respectively, compared with \$6.9 million and \$18.6 million for the three and nine months ended September 30, 2016, respectively. Product gross profit for the three and nine months ended September 30, 2017, included amortization expense of intangible assets of \$1.2 million and \$4.4 million, respectively, compared with \$1.8 million and \$6.1 million for the three and nine months ended September 30, 2016, respectively.

Service gross profit for the three months ended September 30, 2017, was \$102.5 million, or 69.8% of service revenue, compared with \$92.2 million, or 71.1% of service revenue for the three months ended September 30, 2016. Service gross profit for the nine months ended September 30, 2017, was \$296.4 million, or 69.1% of service revenue, compared with \$273.5 million, or 71.5% of service revenue for the nine months ended September 30, 2016. The higher service gross profit for the three and nine months ended September 30, 2017, was driven by higher service revenue, reflecting a larger installed base of *da Vinci* Surgical Systems, partially offset by lower service gross profit margin. The lower service gross profit margin for the three and nine months ended September 30, 2017, as compared with the same periods in 2016, was primarily driven by higher costs to repair and replace *da Vinci Xi* endoscope products.

Service gross profit for the three and nine months ended September 30, 2017, reflected share-based compensation expense of \$3.7 million and \$10.4 million, respectively, compared with \$3.3 million and \$9.4 million for the three and nine months ended September 30, 2016, respectively.

Selling, General and Administrative Expenses

Selling, general and administrative expenses include costs for sales, marketing and administrative personnel, sales and marketing activities, tradeshow expenses, legal expenses, regulatory fees, and general corporate expenses.

Selling, general and administrative expenses for the three months ended September 30, 2017, increased by 22% to \$204.8 million, compared with \$168.0 million for the three months ended September 30, 2016. Selling, general and administrative expenses for the nine months ended September 30, 2017, increased by 16% to \$591.7 million, compared with \$511.6 million for the nine months ended September 30, 2016. The increase for the three and nine months ended September 30, 2017, was primarily due to higher OUS expenses associated with our expanded Asian and European teams, infrastructure to support our growth, higher headcount, and higher litigation charges.

Selling, general and administrative expenses for the three and nine months ended September 30, 2017, included net pre-tax litigation charges of \$9.7 million and \$18.7 million, respectively. No litigation charges were recorded during the three months ended September 30, 2016. Selling, general and administrative expenses for the nine months ended September 30, 2016, included litigation charges of \$6.6 million.

Selling, general and administrative expenses for the three and nine months ended September 30, 2017, reflected share-based compensation expense of \$30.0 million and \$82.3 million, respectively, compared with \$25.3 million and \$72.9 million for the three and nine months ended September 30, 2016, respectively.

Research and Development Expenses

Research and development costs are expensed as incurred. Research and development expenses include costs associated with the design, development, testing, and significant enhancement of our products.

Research and development expenses for the three months ended September 30, 2017, increased by 33% to \$83.4 million, compared with \$62.6 million for the three months ended September 30, 2016. Research and development expenses for the nine months ended September 30, 2017, increased by 42% to \$241.5 million, compared with \$170.5 million for the nine months ended September 30, 2016. The increase was primarily due to higher personnel and other project costs to support a broader set of product development initiatives, including our *da Vinci Single Port* Surgical System, robotic-assisted catheter-based medical devices, advanced imaging and analytics, advanced instrumentation, and future generations of robotics. The increase for the nine months ended September 30, 2017, was also driven by expense related to licensed intellectual property.

Share-based compensation expense charged to research and development expense was \$15.2 million and \$40.9 million for the three and nine months ended September 30, 2017, respectively, compared with \$11.4 million and \$31.5 million for the three and nine months ended September 30, 2016, respectively. Amortization expense related to intangible assets was \$1.9 million and \$5.7 million for the three and nine months ended September 30, 2017, respectively, compared with \$2.5 million and \$7.9 million for the three and nine months ended September 30, 2016, respectively.

Research and development expenses fluctuate with project timing. Based upon our broader set of product development initiative and the stage of the underlying projects, we expect to continue to make substantial investments in research and development and anticipate that research and development expenses will continue to increase in the future.

Interest and Other Income, Net

Interest and other income, net, for the three and nine months ended September 30, 2017, was \$10.8 million and \$29.6 million, respectively, compared with \$10.4 million and \$23.9 million for the three and nine months ended September 30, 2016, respectively.

Income Tax (Benefit) Expense

Income tax (benefit) expense for the three months ended September 30, 2017, was \$(8.1) million, or (2.8)% of income before taxes, compared with \$55.8 million, or 20.9% of income before taxes for the three months ended September 30, 2016. Income tax expense for the nine months ended September 30, 2017, was \$58.4 million, or 7.7% of income before taxes, compared with \$172.8 million, or 24.5% of income before taxes for the nine months ended September 30, 2016. Income tax provision for the three and nine months ended September 30, 2017, compared with the same periods of 2016, primarily benefited from the expiration of statutes of limitations and excess tax benefits recognized in income tax expenses under ASU No. 2016-09, *Improvements to Employee Share-based Payment Accounting*. Effective tax rates for these periods also differ from the U.S. federal statutory rate of 35% due to the effect of income earned by certain of our overseas entities being taxed at rates lower than the federal statutory rate, partially offset by state income taxes. We intend to indefinitely reinvest outside the U.S. all of our undistributed foreign earnings that were not previously subject to U.S. tax.

The effective tax rates for the three and nine months ended September 30, 2017, reflected a \$14.9 million tax benefit mainly related to the release of unrecognized tax benefits due to the expiration of statutes of limitations in various jurisdictions. The effective tax rates for the three and nine months ended September 30, 2017, also reflected tax benefit of \$53.5 million and \$45.7 million, respectively, from reevaluation of certain unrecognized tax benefits as a result of the expiration of such statutes of limitations.

In the first quarter of 2017, we adopted ASU No. 2016-09, which changes how the tax effects of share-based awards are recognized. ASU No. 2016-09 requires excess tax benefits and tax deficiencies associated with employee equity to be recognized

in the provision for income taxes as discrete items in the period when the awards vest or are settled, whereas previously such income tax effects were recorded as part of additional paid-in capital. Our provision for income taxes included excess tax benefits associated with employee equity plans of \$19.7 million and \$82.9 million, which reduced our effective tax rate by 6.8 percentage points and 10.9 percentage points for the three and nine months ended September 30, 2017, respectively. The amount of excess tax benefits or deficiencies will fluctuate from period to period based on the price of our stock, the volume of share-based instruments settled or vested, and the value assigned to employee equity awards under U.S. GAAP. We expect that the adoption of this ASU will result in increased income tax expense volatility.

The tax holiday for our operations in Switzerland is scheduled to end on December 31, 2017. For years after 2017, our Swiss taxable income may be taxed at a higher rate depending on the then applicable federal and cantonal rules. However, we currently do not expect that the end of our Swiss tax holiday will materially impact our future annual Swiss tax obligation.

We are subject to the examination of our income tax returns by the Internal Revenue Service and other tax authorities. The outcome of these audits cannot be predicted with certainty. Management regularly assesses the likelihood of adverse outcomes resulting from these examinations to determine the adequacy of our provision for income taxes. If any issues addressed in our tax audits are resolved in a manner not consistent with management's expectations, we could be required to adjust our provision for income taxes in the period such resolution occurs.

Liquidity and Capital Resources***Sources and Uses of Cash***

Our principal source of liquidity is cash provided by operations and issuance of common stock through exercise of stock options and our employee stock purchase program. Cash and cash equivalents plus short- and long-term investments decreased from \$4.8 billion at December 31, 2016, to \$3.8 billion at September 30, 2017, primarily as a result of a \$2.0 billion accelerated share buyback program executed during the first quarter of 2017, partly offset by cash provided by our operations and employee stock option exercises. Cash generation is one of our fundamental strengths and provides us with substantial financial flexibility in meeting our operating, investing, and financing needs.

As of September 30, 2017, \$1,477.0 million of our cash, cash equivalents, and investments were held by foreign subsidiaries. Amounts held by foreign subsidiaries are generally subject to U.S. income taxation on repatriation to the U.S. We currently have no plans to repatriate any foreign earnings back to the U.S. Our intent is to reinvest these funds outside of the U.S. indefinitely, and we believe our cash flows provided by our U.S. operations will meet our U.S. liquidity needs for the foreseeable future.

Condensed Consolidated Cash Flow Data

The following table summarizes our cash flows for the nine months ended September 30, 2017, and 2016 (in millions):

	Nine Months Ended September 30,	
	2017	2016
Net cash provided by (used in)		
Operating activities	\$ 811.9	\$ 757.3
Investing activities	694.5	(970.4)
Financing activities	(1,670.0)	519.1
Effect of exchange rates on cash and cash equivalents	2.0	1.0
Net increase (decrease) in cash and cash equivalents	<u>\$ (161.6)</u>	<u>\$ 307.0</u>

Operating Activities

For the nine months ended September 30, 2017, cash flow provided by operating activities of \$811.9 million exceeded our net income of \$698.8 million primarily for the following reasons:

1. Our net income included non-cash items, including: share-based compensation of \$153.5 million; depreciation expense of \$61.4 million; deferred income taxes of \$28.8 million; investment related non-cash charges of \$16.8 million; and amortization of intangible assets of \$10.1 million.
2. The non-cash charges outlined above were partly offset by changes in operating assets and liabilities that resulted in \$157.5 million of cash used by operating activities. Operating assets and liabilities are primarily comprised of accounts receivable, inventory, prepaid expenses and other assets, deferred revenue, and other accrued liabilities. Inventory, including the transfer of equipment from inventory to property, plant and equipment, increased by \$82.7 million. Other accrued liabilities decreased by \$69.1 million primarily due to a decrease in income tax payable. Accounts receivable increased by \$37.8 million primarily due to higher revenue and timing of customer billings and collections. Prepaid expenses and other assets increased by \$13.6 million primarily due to an increase in lease receivables. Accrued compensation and employee benefits decreased by \$11.3 million primarily due to the payments of 2016 incentive compensation. The unfavorable impact of these items on cash used by operating activities was partly offset by a \$45.1 million increase in deferred revenue and \$11.9 million increase in accounts payable.

Investing Activities

Net cash provided by investing activities during the nine months ended September 30, 2017, consisted of proceeds from sales and maturities of investments (net of purchases of investments) of \$854.2 million partly offset by acquisition of property and equipment of \$159.7 million. We invest predominantly in high quality, fixed income securities. Our investment portfolio may at any time contain investments in U.S. Treasury and U.S. government agency securities, non-U.S. government agency securities, taxable and/or tax exempt municipal notes, corporate notes and bonds, commercial paper, cash deposits, and money market funds.

Financing Activities

Net cash used in financing activities during the nine months ended September 30, 2017, consisted of \$2.0 billion related to an accelerated share buyback program executed during the first quarter of 2017 that is further described in "Note 7. Stockholders' Equity" and \$53.6 million in taxes paid on behalf of employees related to net share settlements of vested employee equity awards. These uses were partly offset by proceeds from stock option exercises and employee stock purchases of \$381.6 million.

Capital Expenditures

Our business is not capital intensive and we had no material commitments for capital expenditures as of the end of the third quarter of 2017.

Our cash requirements depend on numerous factors, including the market acceptance of our products, the resources we devote to developing and supporting our products, and other factors. In the past, we made substantial investments in our commercial operations, product development activities, facilities, and intellectual property. We expect to continue to devote substantial resources to expand our commercial operations, product development and manufacturing activities, our facilities, as well as procedure adoption and acceptance of our products. Based upon our business model, we anticipate that we will continue to be able to fund future growth through cash provided by our operations. We believe that our current cash, cash equivalents, and investment balances, together with income to be derived from the sale of our products, will be sufficient to meet our liquidity requirements for the foreseeable future.

Critical Accounting Policies and Estimates

The discussion and analysis of our financial condition and results of operations are based upon our Financial Statements, which have been prepared in accordance with U.S. GAAP. The preparation of these Financial Statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues, and expenses. On an ongoing basis, we evaluate our critical accounting policies and estimates. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions. There have been no new or material changes to the critical accounting policies and estimates discussed in our Annual Report on Form 10-K for the fiscal year ended December 31, 2016, that are of significance, or potential significance to the Company.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

There have been no material changes in our market risk during the nine months ended September 30, 2017, compared to the disclosures in Part II, Item 7A of our Annual Report on Form 10-K for the year ended December 31, 2016.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and that such information is accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate, to allow for timely decisions regarding required disclosure.

As required by SEC Rule 13a-15(b), we carried out an evaluation, under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, of the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the period covered by this report. Based on the foregoing, our principal executive officer and principal financial officer concluded that our disclosure controls and procedures were effective at the reasonable assurance level.

Changes in Internal Control over Financial Reporting

There has been no change in our internal control over financial reporting that occurred during our most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

The information included in Note 6 to the Condensed Consolidated Financial Statements (Unaudited) included in Part I, Item 1 of this quarterly report is incorporated herein by reference.

ITEM 1A. RISK FACTORS

You should carefully consider the factors discussed in Part I, "Item 1A. Risk Factors" in our Annual Report on Form 10-K for the fiscal year ended December 31, 2016, which could materially affect our business, financial position or future results of operations. The risks described in our Annual Report on Form 10-K for the fiscal year ended December 31, 2016, are not the only risks we face. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial position, or future results of operations.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

There were no unregistered sales of equity securities during the period covered by this report.

(c) Issuer Purchases of Equity Securities

Since March 2009, we have had an active stock repurchase program. As of September 30, 2017, the Board of Directors has authorized an aggregate amount of up to \$6.2 billion for stock repurchases, of which the most recent authorization occurred in December 2016 when the Board increased the authorized amount available under the Company's share repurchase program to \$3.0 billion. No shares were purchased during the three months ended September 30, 2017. \$991.6 million remained available to repurchase shares under the authorized repurchase program as of September 30, 2017. The authorized stock repurchase program does not have an expiration date.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

ITEM 5. OTHER INFORMATION

Mark Meltzer, Senior Vice President, General Counsel and Chief Compliance Officer, announced on October 16, 2017, that he will retire on July 1, 2018. Mr. Meltzer, who will turn 68 in October 2017, has agreed to continue on a part-time basis after July 1, 2018, as an advisor to the Company. The terms of that arrangement have yet to be finalized. Kara Andersen Reiter, who has served as Vice President, Assistant General Counsel, since January 2015, will succeed Mr. Meltzer as General Counsel and Chief Compliance Officer.

ITEM 6. EXHIBITS

Exhibit Number	Exhibit Description
3.1	<u>Amended and Restated Certificate of Incorporation of Intuitive Surgical, Inc., as amended.</u>
3.2	<u>Amended and Restated Bylaws of Intuitive Surgical, Inc. (incorporated by reference to Exhibit 3.1 of the Current Report on Form 8-K filed with the Securities and Exchange Commission on December 13, 2016).</u>
31.1	<u>Certification of Chief Executive Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.</u>
31.2	<u>Certification of Chief Financial Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.</u>
32.1	<u>Certification of Chief Executive Officer pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.</u>
32.2	<u>Certification of Chief Financial Officer pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.</u>

**CORRECTED
AMENDED AND RESTATED
CERTIFICATE OF INCORPORATION
OF
INTUITIVE SURGICAL, INC.**

INTUITIVE SURGICAL, INC., a corporation organized and existing under the laws of the state of Delaware (the "Corporation") hereby certifies that:

1. The name of the Corporation is Intuitive Surgical, Inc. The name under which this corporation was originally incorporated is Intuitive Surgical Devices, Inc.
2. The date of filing of the Corporation's original Certificate of Incorporation was November 9, 1995.
3. The Corporation filed an Amended and Restated Certificate of Incorporation on June 30, 2003. Said Amended and Restated Certificate requires correction as permitted by Section 103 of the General Corporation law of the State of Delaware.
4. The inaccuracy or defect of said Amended and Restated Certificate of Incorporation is as follows: Due to a clerical error, the Corporation's former Certificate of Incorporation was mistakenly filed in lieu of a Certificate of Amendment.
5. The Amended and Restated Certificate of Incorporation is corrected to read as shown in the attached Exhibit A.

IN WITNESS WHEREOF, the undersigned has signed this certificate this 12th day of September, 2003, and hereby affirms and acknowledges under penalty of perjury that the filing of this Amended and Restated Certificate of Incorporation is the act and deed of Intuitive Surgical, Inc.

INTUITIVE SURGICAL, INC.

By: /s/ Lonnie M. Smith

Lonnie M. Smith

President and Chief Executive Officer

**AMENDED AND RESTATED CERTIFICATE OF INCORPORATION
OF INTUITIVE SURGICAL, INC.
A DELAWARE CORPORATION**

ARTICLE I.

The name of the corporation is **Intuitive Surgical, Inc.**

ARTICLE II.

The address of the corporation's registered office in the State of Delaware is 1013 Centre Road, City of Wilmington, County of New Castle. The name of its registered agent at such address is The Prentice-Hall Corporation System, Inc.

ARTICLE III.

The purpose of this corporation is to engage in any lawful act or activity for which a corporation may be organized under the General Corporation Law of Delaware ("DGCL").

ARTICLE IV.

A. Classes of Stock. This corporation is authorized to issue two classes of stock to be designated, respectively, "Common Stock" and "Preferred Stock." The total number of shares which the corporation is authorized to issue is two hundred five million (205,000,000) shares, of which two hundred million (200,000,000) shares shall be Common Stock, par value \$0.001 per share, and five million (5,000,000) shares shall be Preferred Stock, par value \$0.001 per share.

B. Rights, Preferences and Restrictions of Preferred Stock. The Preferred Stock may be issued from time to time in one or more series. The Board of Directors is hereby authorized, by filing a certificate (a "Preferred Stock Designation") pursuant to DGCL, to fix or alter from time to time the designation, powers, preferences and rights (voting or otherwise) granted upon, and the qualifications, limitations or restrictions of, any wholly unissued series of Preferred Stock, and to establish from time to time the number of shares constituting any such series or any of them; and to increase or decrease the number of shares of any series subsequent to the issuance of shares of that series, but not below the number of shares of such series then outstanding. In case the number of shares of any series shall be decreased in accordance with the foregoing sentence, the shares constituting such decrease shall resume the status that they had prior to the adoption of the resolution originally fixing the number of shares of such series.

ARTICLE V.

For the management of the business and for the conduct of the affairs of the corporation, and in further definition, limitation and regulation of the powers of the corporation, of its directors and of its stockholders or any class thereof, as the case may be, it is further provided that:

A. Management of Business. The management of the business and the conduct of the affairs of the corporation shall be vested in its Board of Directors. The number of directors which shall constitute the whole Board of Directors shall be fixed exclusively by one or more resolutions adopted by the Board of Directors.

B. Board of Directors.

1. Subject to the rights of the holders of any series of Preferred Stock to elect additional directors under specified circumstances, the directors shall be divided into three classes designated as Class I, Class II and Class III, respectively. Directors shall be assigned to each class in accordance with a resolution or resolutions adopted by the Board of Directors. At the first annual meeting of stockholders following the closing of the initial public offering pursuant to an effective registration statement under the Securities Act of 1933, as amended, covering the offer and sale of Common Stock to the public (the "Initial Public Offering"), the term of office of the Class I directors shall expire and Class I directors shall be elected for a full term of three years. At the second annual meeting of stockholders following the Initial Public Offering, the term of office of the Class II directors shall expire and Class II directors shall be elected for a full term of three years. At the third annual meeting of stockholders following the Initial Public Offering, the term of office of the Class III directors shall expire and Class III directors shall be elected for a full term of three years. At each succeeding annual meeting of stockholders, directors shall be elected for a full term of three years to succeed the directors of the class whose terms expire at such annual meeting. During such time or times that the corporation is subject to Section 2115(b) of the California General Corporation Law ("CGCL"), this Section B.1. of this Article V shall become effective and be applicable only when the corporation is a "listed" corporation within the meaning of Section 301.5 of the CGCL.

2. In the event that the corporation is subject to Section 2115(b) of the CGCL AND is not a "listed" corporation or ceases to be a "listed" corporation under Section 301.5 of the CGCL, Section B.1. of this Article V shall not apply and all directors shall be shall be elected at each annual meeting of stockholders to hold office until the next annual meeting.

3. No person entitled to vote at an election for directors may cumulate votes to which such person is entitled, unless, at the time of such election, the corporation is subject to Section 2115(b) of the CGCL AND is not a "listed" corporation or ceases to be a "listed" corporation under Section 301.5 of the CGCL. During this time, every stockholder entitled to vote at an election for directors may cumulate such stockholder's votes and give one candidate a number of votes equal to the number of directors to be elected multiplied by the number of votes to which such stockholder's shares are otherwise entitled, or distribute the stockholder's votes on the same principle among as many candidates as such stockholder thinks fit. No stockholder, however, shall be entitled to so cumulate such stockholder's votes unless (i) the names of such candidate or candidates have been placed in nomination prior to the voting and (ii) the stockholder has given notice at the meeting, prior to the voting, of such stockholder's intention to cumulate such stockholder's votes. If any stockholder has given proper notice to cumulate votes, all stockholders may cumulate their votes for any candidates who have been properly placed in nomination. Under cumulative voting, the candidates receiving the highest number of votes, up to the number of directors to be elected, are elected.

Notwithstanding the foregoing provisions of this section, each director shall serve until his successor is duly elected and qualified or until his death, resignation or removal. No decrease in the number of directors constituting the Board of Directors shall shorten the term of any incumbent director.

C. Removal of Directors.

1. During such time or times that the corporation is subject to Section 2115(b) of the CGCL, the Board of Directors or any individual director may be removed from office at any time without cause by the affirmative vote of the holders of at least a majority of the outstanding shares entitled to vote on such removal; provided, however, that unless the entire Board is removed, no individual director may be removed when the votes cast against such director's removal, or not consenting in writing to such removal, would be sufficient to elect that director if voted cumulatively at an election which the same total number of votes were cast (or, if such action is taken by written consent, all shares entitled to vote were voted) and the entire number of directors authorized at the time of such director's most recent election were then being elected.

2. At any time or times that the corporation is not subject to Section 2115(b) of the CGCL and subject to any limitations imposed by law, Section C.1. above shall no longer apply and removal shall be as provided in Section 141 (k) of the DGCL.

D. Vacancies.

1. Subject to the rights of the holders of any series of Preferred Stock, any vacancies on the Board of Directors resulting from death, resignation, disqualification, removal or other causes and any newly created directorships resulting from any increase in the number of directors, shall, unless the Board of Directors determines by resolution that any such vacancies or newly created directorships shall be filled by the stockholders, except as otherwise provided by law, be filled only by the affirmative vote of a majority of the directors then in office, even though less than a quorum of the Board of Directors, and not by the stockholders. Any director elected in accordance with the preceding sentence shall hold office for the remainder of the full term of the director for which the vacancy was created or occurred and until such director's successor shall have been elected and qualified.

2. If at the time of filling any vacancy or any newly created directorship, the directors then in office shall constitute less than a majority of the whole board (as constituted immediately prior to any such increase), the Delaware Court of Chancery may, upon application of any stockholder or stockholders holding at least ten percent (10%) of the total number of the shares at the time outstanding having the right to vote for such directors, summarily order an election to be held to fill any such vacancies or newly created directorships, or to replace the directors chosen by the directors then in offices as aforesaid, which election shall be governed by Section 211 of the DGCL.

3. At any time or times that the corporation is subject to Section 2115(b) of the CGCL, if, after the filling of any vacancy by the directors then in office who have been elected by stockholders shall constitute less than a majority of the directors then in office, then:

(a) Any holder or holders of an aggregate of five percent (5%) or more of the total number of shares at the time outstanding having the right to vote for those directors may call a special meeting of stockholders; or

(b) The Superior Court of the proper county shall, upon application of such stockholder or stockholders, summarily order a special meeting of stockholders, to be held to elect the entire board, all in accordance with Section 305(c) of the CGCL. The term of office of any director shall terminate upon that election of a successor.

E. Bylaw Amendments. Subject to paragraph (h) of Section 43 of the Bylaws, the Bylaws may be altered or amended or new Bylaws adopted by the affirmative vote of at least sixty-six and two-thirds percent (66-2/3%) of the voting power of all of the then-outstanding shares of the voting stock of the corporation entitled to vote. The Board of Directors shall also have the power to adopt, amend, or repeal Bylaws.

F. Ballots. The directors of the corporation need not be elected by written ballot unless the Bylaws so provide.

G. Action by Stockholders. No action shall be taken by the stockholders of the corporation except at an annual or special meeting of stockholders called in accordance with the Bylaws; no action shall be taken by the stockholders by written consent.

H. Advance Notice. Advance notice of stockholder nominations for the election of directors and of business to be brought by stockholders before any meeting of the stockholders of the corporation shall be given in the manner provided in the Bylaws of the corporation.

I. Special Meetings of Stockholders. Special meetings of the stockholders may be called only by the Chairman of the Board, the Chief Executive Officer, or a majority of the members of the Board of Directors.

ARTICLE VI.

A. The liability of the directors for monetary damages shall be eliminated to the fullest extent under applicable law.

B. This corporation is authorized to provide indemnification of agents (as defined in Section 317 of the CGCL) for breach of duty to the corporation and its shareholders through bylaw provisions or through agreements with the agents, or through shareholder resolutions, or otherwise, in excess of the indemnification otherwise permitted by Section 317 of the CGCL, subject, at any time or times the corporation is subject to Section 2115(b) to the limits on such excess indemnification set forth in Section 204 of the CGCL.

C. Any repeal or modification of this Article VI shall be prospective and shall not affect the rights under this Article VI in effect at the time of the alleged occurrence of any act or omission to act giving rise to liability or indemnification.

ARTICLE VII.

A. The corporation reserves the right to amend, alter, change or repeal any provision contained in this Certificate of Incorporation, in the manner now or hereafter prescribed by statute, except as provided in paragraph B of this Article VII, and all rights conferred upon the stockholders herein are granted subject to this reservation.

B. Notwithstanding any other provisions of this Certificate of Incorporation or any provision of law which might otherwise permit a lesser vote or no vote, but in addition to any affirmative vote of the holders of any particular class or series of the voting stock required by law, this Certificate of Incorporation or any Preferred Stock Designation, the affirmative vote of the holders of at least sixty-six and two-thirds percent (66-2/3%) of the voting power of all of the then-outstanding shares of the voting stock, voting together as a single class, shall be required to alter, amend or repeal Articles V, VI and VII.

**CERTIFICATE OF AMENDMENT TO
AMENDED AND RESTATED
CERTIFICATE OF INCORPORATION
OF
INTUITIVE SURGICAL, INC.
a Delaware Corporation**

Pursuant to § 242 of the General Corporation Law
of the State of Delaware

It is hereby certified that:

1. The following amendment to the Amended and Restated Certificate of Incorporation of the corporation has been duly adopted in accordance with the provisions of Section 242 of the General Corporation Law of the State of Delaware:

Paragraph (a) of Article Four of Exhibit A of the Amended and Restated Certificate of Incorporation is hereby amended to read in its entirety as follows:

“A. Classes of Stock. This corporation is authorized to issue two classes of stock to be designated, respectively, “Common Stock” and “Preferred Stock.” The total number of shares which the corporation is authorized to issue is one hundred two million five hundred thousand (102,500,000) shares, of which one hundred million (100,000,000) shares shall be Common Stock, par value \$0.001 per share, and two million five hundred thousand (2,500,000) shares shall be Preferred stock, par value \$0.001 per share.

When the foregoing amendment becomes effective, (i) each share of Common Stock issued and outstanding or held in the treasury of the corporation immediately prior to the time this amendment becomes effective shall be reclassified and changed into and shall constitute one-half (1/2) of one fully paid and nonassessable share of Common Stock and (ii) each share of Preferred Stock issued and outstanding or held in the treasury of the corporation immediately prior to the time this amendment becomes effective shall be reclassified and changed into and shall constitute one-half (1/2) of one fully paid and nonassessable share of Preferred Stock, in each case without the necessity of further action of any kind (the “Reverse Split”). Any fractional shares remaining after applying the Reverse Split to each certificate representing shares of Common Stock or Preferred Stock then held by any holder shall be redeemed at a purchase price equal to the closing bid price of the Common Stock on the Nasdaq National Market on the effective date of the Reverse Split. Shares of capital stock that were outstanding prior to the Reverse Split, and that are not outstanding after and as a result of the Reverse Split, shall resume the status of authorized but unissued shares of Common Stock or Preferred Stock, as the case may be.”

2. The capital of the corporation will not be reduced under or by reason of the foregoing amendment.

IN WITNESS WHEREOF, this Certificate is hereby executed by the undersigned on June 30, 2003.

CERTIFICATE OF INCORPORATION
OF
INTUITIVE SURGICAL, INC.**
a Delaware Corporation

Pursuant to § 242 of the General Corporation Law
of the State of Delaware

It is hereby certified that the following amendment to the Amended and Restated Certificate of Incorporation of the corporation has been duly adopted in accordance with the provisions of Section 242 of the General Corporation Law of the State of Delaware:

Section B of Article V of Exhibit A of the Amended and Restated Certificate of Incorporation is hereby amended to read in its entirety as follows:

“B. Board of Directors.

1. Subject to the rights of the holders of any series of Preferred Stock to elect additional directors under specified circumstances, commencing with the 2013 annual meeting of stockholders, directors shall be elected at each annual meeting of stockholders to hold office until the next annual meeting. Directors elected at the 2010 annual meeting of stockholders shall hold office until the 2013 annual meeting of stockholders, directors elected at the 2011 annual meeting of stockholders shall hold office until the 2014 annual meeting of stockholders, and directors elected at the 2012 annual meeting of stockholders shall hold office until the 2015 annual meeting of stockholders. Notwithstanding the foregoing provisions of this section, each director shall serve until his successor is duly elected and qualified or until his death, resignation or removal. No decrease in the number of directors constituting the Board of Directors shall shorten the term of any incumbent director.”

IN WITNESS WHEREOF, this Certificate is hereby executed by the undersigned on 4/21, 2012.

STATE OF DELAWARE
CERTIFICATE OF AMENDMENT
OF AMENDED AND RESTATED CERTIFICATE OF INCORPORATION

Intuitive Surgical, Inc. (the "Corporation"), a corporation organized and existing under and by virtue of the General Corporation Law of the State of Delaware does hereby certify:

FIRST: That Paragraph (A) of Article Four of Exhibit A of the Amended and Restated Certificate of Incorporation is hereby amended to read in its entirety as follows:

"A. Classes of Stock. This corporation is authorized to issue two classes of stock to be designated, respectively, "Common Stock" and "Preferred Stock." The total number of shares which the corporation is authorized to issue is three hundred two million five hundred thousand (302,500,000) shares, of which three hundred million (300,000,000) shares shall be Common Stock, par value \$0.001 per share, and two million five hundred thousand (2,500,000) shares shall be Preferred Stock, par value \$0.001 per share. At the effective time of this Certificate of Amendment (the "Effective Time"), each issued and outstanding share of the corporation's Common Stock shall be divided into three (3) validly issued, fully paid and non-assessable shares of Common Stock reflecting a three (3) for one (1) stock split (the "Stock Split"). The Stock Split shall occur without any further action on the part of the corporation or the holders of shares of Common Stock and whether or not certificates representing such holders' shares prior to the Stock Split are surrendered for cancellation."

SECOND: That said amendment was duly adopted in accordance with the provisions of Section 242 of the General Corporation Law of the State of Delaware.

IN WITNESS WHEREOF, the Corporation has caused this certificate to be signed this 29th day of September, 2017.

Title: *Chief Executive Officer*

**Certification of Chief Executive Officer
Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002**

I, Gary S. Guthart, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Intuitive Surgical, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
